Consolidated Financial Statements

**December 31, 2012**

(expressed in thousands of dollars)

February 19, 2013

## **Independent Auditor's Report**

### **To the Members of Prospera Credit Union**

We have audited the accompanying consolidated financial statements of Prospera Credit Union, which comprise the consolidated statement of financial position as at December 31, 2012 and the consolidated statements of income and comprehensive income, changes in members' equity and cashflows for the year then ended, and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

#### **Management's responsibility for the consolidated financial statements**

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### **Auditor's responsibility**

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

---

T: +1 604 806 7000, F: +1 604 806 7806*

**Opinion**

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Prospera Credit Union as at December 31, 2012 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

### 1 General information

Prospera Credit Union (the “Credit Union”) is incorporated under the Credit Union Incorporation Act of British Columbia and its operations are subject to the Financial Institutions Act of British Columbia (the “FIA”). The Credit Union’s primary business activities include providing financial services to its members and the general public across British Columbia. It provides retail and business financial services through 16 branches, on-line banking and a contact centre. In addition, the Credit Union provided services through seven insurance offices until April 30, 2011 when all related assets were sold through its wholly owned subsidiary, Prospera Insurance Agencies Ltd.

The Credit Union is domiciled in Canada and its registered office is at #500 - 32071 S. Fraser Way, Abbotsford, British Columbia.

The consolidated financial statements have been approved for issue by the Board of Directors (the “Board”) on February 13, 2013. The Board has the authority to amend the financial statements after issue.

### 2 Basis of presentation

#### a) Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”). The significant accounting policies applied in the preparation of the consolidated financial statements are set out in note 3. The consolidated financial statements comply with the requirements of IFRS.

#### b) Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis, except for available-for-sale financial assets, financial assets and financial liabilities accounted for at fair value through profit or loss and all derivative financial instruments, which are measured at fair value.

#### c) Functional and presentation currency

These consolidated financial statements are presented in Canadian dollars, which is also the Credit Union’s functional currency. The figures shown in the consolidated financial statements are expressed in thousands of dollars, unless otherwise stated.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

d) Use of estimates and judgments

The preparation of the consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Information on significant areas of uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are described in note 4.

### 3 Summary of significant accounting policies

a) Consolidation

The consolidated financial statements include the assets, liabilities and the results of operations and cash flows of the Credit Union and its subsidiaries. The wholly owned subsidiaries are Prospera Insurance Agencies Ltd., Prospera Technologies Inc., 413297 B.C. Ltd., and Prospera Holdings Ltd.

Intercompany balances, and income and expenses arising from intercompany transactions, are eliminated in preparing the consolidated financial statements. Intercompany losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred. The integration of the subsidiaries into the consolidated financial statements is based on consistent accounting and valuation methods for similar transactions and other occurrences under similar circumstances.

b) Foreign currency translation

Transactions in foreign currencies are translated to the functional currency of the Credit Union at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between the amortized cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortized cost in the foreign currency translated at the exchange rate at the end of the reporting period. Foreign currency differences arising on translation are recognized in the consolidated statement of income. Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary items in a foreign currency that are measured at fair value are translated using the exchange rates at the date when the fair value was determined.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

c) Cash resources

Cash and cash equivalents include highly liquid balances with less than 90 days maturity from the original date of issuance. Interest bearing deposits with financial institutions include deposits with Central 1 Credit Union ("Central 1") and restricted cash deposits held in custodian accounts for repayment on secured borrowings.

d) Financial assets and liabilities: categorization, measurement and recognition

i) Financial assets

Management determines the categorization of its financial assets at initial recognition. The Credit Union initially recognizes loans and receivables and deposits on the date that they are originated. All other financial assets, including assets designated at fair value through profit or loss ("FVTPL"), are recognized initially on the trade date at which the Credit Union becomes a party to the contractual provisions of the instrument. The Credit Union's financial assets are categorized as one of the following: financial assets at FVTPL, loans and receivables, financial assets available-for-sale ("AFS") and financial assets held-to-maturity ("HTM").

*Financial assets at FVTPL*

This category comprises financial assets classified as FVTPL and financial assets designated by the Credit Union as FVTPL upon initial recognition.

A financial asset is required to be classified as FVTPL if it is acquired principally for the purpose of selling it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivative financial instruments are also categorized as FVTPL unless they are designated and are effective as hedging instruments in a hedge accounting relationship. Gains and losses on assets classified as FVTPL are recorded in net income.

The Credit Union has not designated any assets as FVTPL. The Credit Union's financial assets classified as FVTPL consist of retained interests in securitized loans and derivative financial instruments such as equity options and interest rate swaps related to securitized loans, index-linked deposit contracts, and economic hedging.

*Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- 1) those that the Credit Union intends to sell immediately or in the short term, which are classified as FVTPL, and those that the Credit Union upon initial recognition designates as FVTPL;
- 2) those that the Credit Union upon initial recognition designates as AFS; or

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

- 3) those for which the holder may not recover substantially all of its initial investment, for reasons other than credit deterioration.

Loans and receivables are recorded at fair value on initial recognition and subsequently at amortized cost using the effective interest method.

The Credit Union's loans and receivables principally consist of cash and cash equivalents, loans to members, interest bearing deposits with financial institutions, and other receivables.

### *Financial assets available-for-sale*

AFS assets are those non-derivative financial assets that are designated as AFS or are not classified as FVTPL, not designated as FVTPL or do not qualify as loans and receivables. AFS assets are recorded at fair value. Subsequently, they are carried at fair value, unless they do not have a quoted market price in an active market and fair value is not reliably determinable, in which case they are carried at cost.

Unrealized gains and losses arising from changes in the fair value of AFS financial assets are recognized directly in equity, until the financial asset is derecognized or impaired. As a result of the derecognition or impairment of an AFS asset, the cumulative gain or loss previously recognized in equity is recognized in the consolidated statement of income.

Interest income on AFS assets is calculated using the effective interest method and is recognized in the consolidated statement of income. Dividends on AFS equity instruments are recognized in the consolidated statement of income when the Credit Union's right to receive payment is established.

The Credit Union's AFS assets consist of investments.

### *Financial assets held-to-maturity*

HTM assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Credit Union's management has the positive intention and ability to hold to maturity, other than:

- 1) those that Credit Union upon initial recognition designates as FVTPL;
- 2) those that the Credit Union designates as AFS; and
- 3) those that meet the definition of loans and receivables.

These are initially recognized at fair value including direct and incremental transaction costs and measured subsequently at amortized cost, using the effective interest method. Interest on HTM assets is recognized in the consolidated statement of income.

The Credit Union's HTM assets consist of government backed securities.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

ii) Financial liabilities

Management determines the categorization of its financial liabilities at initial recognition. The Credit Union initially recognizes financial liabilities (including liabilities designated at FVTPL) on the trade date at which the Credit Union becomes a party to the contractual provisions of the instrument. Financial liabilities are categorized as FVTPL or financial liabilities at amortized cost. Financial liabilities are derecognized when extinguished.

*Financial liabilities at FVTPL*

Upon initial recognition, financial liabilities are classified as FVTPL or are designated by the Credit Union as FVTPL.

A financial liability is required to be classified as FVTPL if it is incurred principally for the purpose of repurchasing it in the near term or if it is part of a portfolio of identified financial liabilities that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivative liabilities are also categorized as FVTPL unless they are designated and are effective hedging instruments in a hedge accounting relationship. Gains and losses on FVTPL financial liabilities are recorded in net income.

At December 31, 2012, the Credit Union has financial liabilities designated as FVTPL. The Credit Union's financial liabilities classified as FVTPL consist of equity linked derivatives, secured borrowings and other derivative liabilities.

*Financial liabilities at amortized cost*

Financial liabilities that are not classified as FVTPL fall into this category. Financial liabilities at amortized cost consist of amounts drawn on lines of credit, accounts payable, member deposits, secured borrowings, and member deposit shares. These are measured at fair value on initial recognition and subsequently at amortized cost using the effective interest method.

iii) Fair value of financial instruments

The best evidence of fair value at initial recognition is prices quoted in an active market. Fair values of financial instruments quoted in active markets are determined by reference to closing bid prices at the reporting date. If there is no active market for a financial instrument, the Credit Union establishes fair value using an appropriate valuation technique. These techniques principally include the use of recent arm's length transactions for investments in unquoted securities, discounted cash flow analysis for derivatives and third-party option pricing models for index-linked option contracts and other valuation techniques commonly used by market participants.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Fair values reflect the credit risk of the instruments and include adjustments to take account of the credit risk of the Credit Union and the counterparty as relevant. Fair value estimates obtained from models are adjusted for other factors, such as liquidity risk or model uncertainties, to the extent that the Credit Union believes a third-party market participant would take them into account in pricing a transaction. Fair values determined by applying valuation techniques utilize independent observable market inputs to the maximum extent possible.

#### iv) Impairment of financial assets

The Credit Union assesses, at each consolidated statement of financial position date, whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are recorded only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and the loss event has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Objective evidence that financial assets are impaired can include significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of a loan or advance by the Credit Union on non-market terms that the Credit Union would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or other observable data relating to a group of assets such as conditions that correlate with defaults in the group.

#### *Financial assets classified as loans and receivables*

The Credit Union maintains an allowance for credit losses that, in management's estimation, is considered adequate to provide for credit-related losses. The allowance for credit losses consists of individual and collective allowances. The individual allowance is determined on the basis of specific loans that, in management's opinion, may not be fully collectible. The individual allowance is the amount required to reduce the carrying value of an impaired loan to its present value of estimated future cash flows discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment is the current effective interest rate determined under the contract at the time the loan becomes impaired.

For the purposes of a collective evaluation of impairment, the portfolio is grouped on the basis of similar credit risk characteristics. These characteristics are relevant to the estimation of future cash flows and historical loss experience which is adjusted on the basis of current observable data to reflect the effects of current conditions. Assets that are individually assessed for impairment and for which no individual allowances are recorded are included in a collective assessment of impairment.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

The Credit Union adjusts its input to its collective allowance methodology on an ongoing basis, taking into account factors such as historical loss experience and adjusting for current observable data that did not impact the period which the historical loss experience was based on. Estimates of changes in future cash flows for groups of assets reflect and are directionally consistent with changes in related observable data from period to period (for example, bankruptcy, residential mortgage delinquency, or other factors indicative of changes in the probability of losses by the Credit Union and in their magnitude).

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognized in the consolidated statement of income in loan impairment expense.

Loans that were past due and either subject to collective impairment assessment or are individually significant and whose terms have been renegotiated are no longer considered to be past due but are treated as new loans. In subsequent years, if the loan becomes past due again, this will be disclosed only if the loan is renegotiated.

The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Credit Union to reduce any differences between loss estimates and actual loss experience. When a loan is uncollectible, it is written off after all the necessary procedures have been completed and the amount of the final loss has been determined.

### *Assets classified as available-for-sale*

A significant or prolonged decline in the fair value of an AFS equity security below its cost is considered objective evidence in determining whether the asset is impaired. An AFS debt instrument may be identified as impaired due to circumstances which can include actual delinquency in contractual payment of principal or interest and/or significant events which indicate there is doubt as to the collectibility of the principal or contractual interest. For designated AFS assets, if any such evidence exists, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statement of income, is reclassified from equity and recognized in the consolidated statement of income.

If, in a subsequent period, the fair value of a debt instrument classified as AFS increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the consolidated statement of income, the impairment loss is reversed through the consolidated statement of income. Impairment losses recognized in the consolidated statement of income on equity instruments are not reversed.

**Prospera Credit Union**  
Notes to Consolidated Financial Statements  
**December 31, 2012**

---

(expressed in thousands of dollars)

*Assets classified as held-to-maturity*

A HTM debt instrument may be identified as impaired due to circumstances which can include actual delinquency in contractual payment of principal or interest and/or significant events which indicate there is doubt as to the collectibility of the principal or contractual interest. In the case of an impairment, the impairment loss is reported as a deduction from the carrying value of the investment and recognized in the consolidated statement of income.

e) Property held for resale

In certain circumstances, the Credit Union may take possession of property held as collateral as a result of foreclosure on loans that are in default. Foreclosed properties are classified as assets held for sale and are measured at the lower of the carrying amount and the fair value less costs to sell.

The Credit Union does not, as a rule, occupy repossessed properties for its business use. These assets are normally sold in a manner that maximizes the benefit to the Credit Union, the member and the member's other creditors, and may involve the use of realtors.

The Credit Union does not hold any properties that were acquired as a result of loan default. Property held for resale by the Credit Union, acquired previously for potential future development, was sold during the year ended December 31, 2011.

f) Derivatives and hedge accounting

Derivative financial instruments are financial contracts whose value changes in response to a change in a specified interest rate, exchange rate or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Derivative contracts usually have no initial net investment or a net investment which would be smaller than a non-derivative contract and are settled at a future date.

Derivatives are initially recognized at fair value on the date a derivative contract is entered into. They are subsequently re-measured at their fair value and reported as assets where they have a positive fair value or as liabilities where they have a negative fair value.

Derivatives may also be embedded in other financial instruments and are treated as separate derivatives when:

- i) their economic characteristics and risks are not closely related to those of the host contract;
- ii) a separate instrument with the same terms would meet the definition of a derivative instrument; and
- iii) the host contract is not designated as FVTPL or classified as FVTPL. Changes in fair value on derivative financial instruments not qualifying for hedge accounting are recognized in interest income or expense as appropriate in the consolidated statement of income.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

The Credit Union designates derivatives as either hedges of highly probable future cash flows attributable to a recognized asset or liability, or a forecasted transaction (cash flow hedge), or FVTPL derivatives in instances where the derivative does not qualify or has not been designated as a hedge in a hedge accounting relationship. The Credit Union periodically uses derivatives for economic hedging purposes to mitigate an identified financial instrument risk.

g) Cash flow hedges

The Credit Union uses hedge accounting for derivatives designated as cash flow hedges provided certain criteria are met. The Credit Union documents the relationship, at its inception, between hedged items and hedging instruments, as well as identifying the risk being hedged and its risk management objective and strategy for undertaking various hedge transactions. The Credit Union also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in the cash flows attributable to the hedged risk.

The effective portion of changes in the fair value of a derivative that is designated and qualifies as a cash flow hedge is recognized in the consolidated statement of changes in members' equity. The gain or loss relating to the ineffective portion is recognized immediately in the consolidated statement of income. Amounts accumulated in equity are reclassified to the consolidated statement of income in the periods when the hedged item affects profit or loss. When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, hedge accounting ceases and any cumulative gain or loss existing in equity at that time remains in equity and is recognized when the hedged forecast transaction is ultimately recognized in the consolidated statement of income. However, when a forecast transaction is no longer expected to occur, or when the hedged item expires or is sold, the cumulative gain or loss that was deferred in equity is immediately transferred to the consolidated statement of income.

h) Derecognition of financial instruments

Financial assets are derecognized when the contractual rights to receive the cash flows from these assets have ceased to exist or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred. If the Credit Union has neither transferred nor retained substantially all the risks and rewards of the transferred financial asset, it assesses whether it has retained control over the transferred asset. If control has been retained, the Credit Union continues to recognize the transferred asset to the extent of its continuing involvement. If control has not been retained, the Credit Union derecognizes the transferred asset.

Financial liabilities are derecognized when they have been redeemed or otherwise extinguished.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

The Credit Union, through securitizations, periodically transfers loans to independent third parties. For securitization transactions initiated after the date of transition to IFRS (January 1, 2010), where the Credit Union's securitizations and other transfers of receivables do not result in a transfer of contractual cash flows of the receivables or an assumption of an obligation to pay the cash flows of the receivable to a transferee, the Credit Union has not derecognized the transferred receivables and has instead recorded a secured borrowing with respect to any consideration received.

For securitization transactions initiated prior to the date of transition to IFRS, the Credit Union continues to derecognize assets based on the optional election under IFRS 1, *First time adoption of International Financial Reporting Standards*. The Credit Union accounts for gains or losses in the consolidated statement of income. The amount of the gain or loss is based on the carrying value of the loans transferred, allocated between the loans sold and retained interests based on their relative fair values at the date of transfer. As market prices are not available for such asset sales, the Credit Union estimates fair value based on the present value of expected future cash flows. Fair values are determined by making the maximum use of market-based inputs and taking into consideration discount rates, forward yield curves and loan specific factors such as expected credit losses and rates of prepayments. The Credit Union also calculates an estimated servicing liability for the ongoing administration of securitized loans, where ongoing administrative services are provided to the independent third parties. The deferred servicing liability is recorded as an accrued expense and amortized to the consolidated statement of income over the estimated rate of loan prepayments.

The retained interest is amortized over the estimated remaining life of the underlying loans sold. Changes in estimated future cash flows are re-estimated at each year-end and discounted to the estimated present value using the original effective interest rate, with any adjustments recognized as increases or decreases to interest income.

i) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognized amounts with the same counterparty and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

j) Interest income and expenses

Interest income or expense for all interest-bearing financial instruments is recognized within interest income or interest expense in the consolidated statement of income using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Credit Union estimates future cash flows considering all contractual terms of the financial instrument but does not consider future credit losses.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

The calculation of the effective interest method includes all fees and costs paid or received between parties to the contract that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability. Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Interest income and expenses presented in the consolidated statement of income include:

- i) interest on financial assets and financial liabilities measured at amortized cost, calculated on an effective interest basis;
  - ii) interest on AFS investment securities calculated on an effective interest basis;
  - iii) the effective portion of fair value changes in qualifying hedging derivatives designated in cash flow hedges of variability in interest cash flows, in the same period that the hedged cash flows affect interest income/expense;
  - iv) fair value changes in qualifying derivatives, including hedge ineffectiveness; and
  - v) gains or losses on economic hedges.
- k) Fee and commission income

The accounting treatment for loan fees varies depending on the transaction. Fees that are considered to be adjustments to loan yield are recognized using the effective interest method. The effective interest method capitalizes fees and transaction costs on the consolidated statement of financial position and amortizes them to interest income over the expected life of the related loan. Mortgage prepayment fees are recognized in interest income when received, unless they relate to a minor modification to the terms of the mortgage, in which case the fees are recognized over the expected remaining term of the original mortgage using the effective interest method. Loan origination, restructuring and renegotiation fees for commercial loans are recorded as interest income over the expected term of the loan using the effective interest method. Commitment fees are recorded in interest income over the expected term of the loan, unless the loan commitment is not expected to be used in which case it is recorded to other income. Loan discharge and administration fees are recorded directly to other income when the loan transaction is complete.

Loan fees that are recognized using the effective interest method are included with loan balances in the consolidated statement of financial position.

Service charges and foreign exchange transaction fees are recognized on an accrual basis when the service is performed.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Commission income is earned on the sale of insurance policies and is recognized as at the related insurance policy's effective date. The Credit Union may receive additional commissions from insurance companies, which are recorded at the earlier of the period in which amounts can be reliably measured or the period in which the amounts are received. The Credit Union maintains an allowance, if required, for estimated policy cancellations and commission returns based upon the application of historical policy cancellation and commission return rates.

Investment management fees, mutual fund fees and financial planning fees are recorded at the date of sale on an accrual basis.

l) Impairment of non-financial assets

Assets that have an indefinite useful life, for example goodwill, are not subject to amortization and are tested annually for impairment. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

m) Property, premises and equipment

i) Recognition and measurement

All premises and equipment used by the Credit Union are measured at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

ii) Subsequent costs

Subsequent expenditures are included in the asset's carrying amount or are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Credit Union and the cost of the item can be reliably measured.

All other repair and maintenance costs are charged to the statement of income during the financial period in which they are incurred.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

### iii) Depreciation

Land is carried at cost and is not depreciated. Asset classes are further categorized for depreciation where significant differences in the estimated useful life of the various components of individually significant assets are identified. Depreciation is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

Leasehold improvements	3 to 10 years
Computer equipment	3 to 10 years
Office furniture	3 to 7 years
Equipment	3 to 7 years

The residual values and useful lives of premises and equipment are reviewed, and adjusted if appropriate, at each consolidated statement of financial position date. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the consolidated statement of income.

### n) Intangibles

#### i) Computer software

Computer software is capitalized when the future economic benefit is expected to exceed a period of one year. Otherwise, software costs are expensed when incurred. Capitalized software costs are initially recognized at cost and amortized using the straight-line method over the expected useful life. The expected useful life ranges from 3 to 10 years.

#### ii) Goodwill

The Credit Union elected to apply IFRS 3, *Business Combinations*, prospectively for business combinations that occurred prior to the Transition Date. Goodwill arose on the acquisition of various insurance brokerage businesses and represents the excess of the cost of an acquisition over the fair value of the share of the identifiable assets acquired, net of liabilities assumed, at the date of acquisition. Goodwill on acquisition of subsidiaries is included in intangibles.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Goodwill is allocated to cash generating units for the purpose of impairment testing. The allocation is made to those cash generating units or groups of cash generating units that are expected to benefit from the business combination from which the goodwill arose. Goodwill is tested annually, as well as whenever a trigger event has been observed, for impairment by comparing the present value of the expected future cash flows from a cash generating unit with the carrying value of its net assets, including attributable goodwill, and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed.

o) Leased assets

In accordance with International Accounting Standards (“IAS”) 17, *Leases*, the economic ownership of a leased asset is transferred to the lessee if the lessee bears substantially all the risks and rewards related to the ownership of the leased asset. In some cases, the lease transaction is not always conclusive, and management uses judgment in determining whether the lease is a finance lease arrangement that transfers substantially all the risks and rewards incidental to ownership. If this determination is positive, the related asset is then recognized by the lessee at the inception of the lease at an amount equal to the lower of its fair value and the present value of the minimum lease payments. A corresponding amount is recognized as a finance lease liability.

All of the Credit Union’s lease agreements are classified as operating leases. Payments on operating lease agreements are recognized as an expense on a straight-line basis over the lease term. Associated costs such as maintenance and insurance are expensed as incurred.

p) Income tax

Income tax expense comprises current and deferred taxes. Current and deferred taxes are recognized in the consolidated statement of income except to the extent that they relate to items recognized directly in members’ equity or in other comprehensive income.

i) Current income tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

ii) Deferred income tax

Deferred tax is recognized with respect to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities against current tax assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable income will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

q) Employee benefits

The Credit Union operates various pension plans. The plans are generally funded through contributions to trustee-administered funds determined by periodic actuarial calculations. The Credit Union has both defined benefit and defined contribution plans.

i) Defined benefit pension plans

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors, such as age, years of service and compensation.

The liability recognized in the Credit Union's consolidated statement of financial position in respect of its defined benefit pension plans is the present value of the defined benefit obligation at the date of the consolidated statement of financial position less the fair value of plan assets, together with adjustments for past service costs. The fair value of plan assets recognized is limited to the amount from which the Credit Union can derive a future economic benefit. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized immediately in other comprehensive income and are not recycled to the consolidated statement of income. Past-service costs are recognized immediately in the consolidated statement of income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortized on a straight-line basis over the vesting period.

ii) Post-employment health care benefits

The Credit Union operates a post-employment health care benefit plan. The method of accounting, assumptions and the frequency of valuations are similar to those used for defined benefit pension plans.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

iii) Defined contribution pension plans

For defined contribution plans, the Credit Union pays a specified flat rate for employer contributions. The Credit Union has no further payment obligations once the contributions have been paid. The contributions are recognized as an employee benefit expense on an accrual basis in the periods during which services are rendered by employees.

iv) Participation in multi-employer pension plan

The Credit Union provides defined retirement benefits to certain employees through a multi-employer plan administered by Central 1. Each member credit union is exposed to the actuarial risks of the other employers with the result that, in the Credit Union's opinion, there is no reasonable way to allocate any defined benefit obligations. The Plan has informed the Credit Union that it is not able to provide defined benefit information on a discrete employer basis as the investment records are not tracked by individual employer and each employer is exposed to the actuarial risks of the Plan as a whole. Accordingly, the Credit Union's participation in the Plan is accounted for as a defined contribution plan with contributions recorded on an accrual basis. The Credit Union has provided additional disclosure on the overall funding status of the multi-employer plan and future contribution levels in note 14(f).

r) Related parties

A related party is a person or an entity that is related to the Credit Union.

i) A person or a close member of that person's family is related to the Credit Union if that person:

- 1) has control or joint control over the Credit Union, with the power to govern the Credit Union's financial and operating policies;
- 2) has significant influence over the Credit Union, participating in financial or operating policy decisions, but not control over these policies; or
- 3) is a member of the key management personnel of the Credit Union. Key management personnel, consistent with the definition under IAS 24, *Related Party Disclosures*, are persons having authority and responsibility for planning, directing and controlling the activities of the Credit Union, directly or indirectly, including any director (whether executive or otherwise) of the Credit Union.

ii) An entity is related to the Credit Union if any of the following conditions apply:

- 1) The entity and the Credit Union are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
- 2) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

- 3) Both entities are joint ventures of the same third party.
  - 4) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
  - 5) The entity is a post-employment benefit plan for the benefit of employees of either the Credit Union or an entity related to the Credit Union.
  - 6) The entity is controlled or jointly controlled by a person identified in (i) above.
  - 7) A person identified in (i)(1) above has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
- s) Provisions

A provision is recognized if, as a result of a past event, the Credit Union has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Credit Union from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Credit Union recognizes any impairment loss on the assets associated with the contract.

- t) Equity and non-equity shares

Upon opening an account at the Credit Union, new members are required to purchase a minimum of 25 Class A Membership equity shares (junior members - five shares). Class A Membership equity shares are redeemable on demand by the member. Periodically, members may purchase Class F, G, H or I Preferred shares, as authorized by the Board, which are redeemable at the end of the time periods stated for that particular class of share. Accordingly, these classes of shares are recorded as member deposits.

Class A Membership, Class C Investment, Class D Insured, Class E Equity, and Preferred shares of the Credit Union are not subject to guarantee by the Credit Union Deposit Insurance Corporation of British Columbia ("CUDIC"). No Class H or I Preferred shares are issued. Dividends may be declared annually on Class A Membership, Class C Investment, Class E Equity and Preferred shares at the discretion of the Board.

Members, periodically, as authorized by the Board, are permitted to purchase Class C Investment and Class E Equity shares. Redemption of Class C Investment and Class E Equity shares is subject to certain conditions and approval of the Board. Accordingly, they are recorded as members' equity.

## Notes to Consolidated Financial Statements

### December 31, 2012

---

(expressed in thousands of dollars)

u) Standards and interpretations issued but not yet effective

At December 31, 2012, a number of standards and interpretations, and amendments thereto, had been issued by the IASB, which are not effective for these consolidated financial statements. Those which are expected to have an effect on the Credit Union's consolidated financial statements are discussed below.

i) IFRS 9, *Financial Instruments*

In November 2009, the IASB issued IFRS 9, *Financial Instruments*, ("IFRS 9") which introduced new requirements for the classification and measurement of financial assets. In October 2010, the IASB issued additions to IFRS 9 relating to financial liabilities. Together, these changes represent the first phase in the IASB's planned replacement of IAS 39, *Financial Instruments: Recognition and Measurement*, ("IAS 39") with a less complex and improved standard for financial instruments.

The standard is effective for annual periods beginning on or after January 1, 2013, but the IASB is delaying the mandatory application until January 1, 2015. The main changes to the requirements of IAS 39 are summarized below:

All financial assets that are currently in the scope of IAS 39 will be classified at either amortized cost or fair value. The AFS, HTM and loans and receivables categories will no longer exist. Classification of financial assets is based on an entity's business model for managing its financial assets and the contractual cash flow characteristics of the instrument. Reclassifications between the two categories are prohibited unless there is a change in the entity's business model.

A financial asset is measured at amortized cost if two criteria are met:

- 1) the objective of the business model is to hold the financial asset for the collection of contractual cash flows; and
- 2) the contractual cash flows of the instrument are solely payments of principal and interest on the principal outstanding.

All other financial assets are measured at fair value. Movements in the fair value of financial assets classified at fair value are recognized in profit or loss, except for equity investments where an entity takes the option to designate an equity instrument that is not held for trading at fair value through other comprehensive income. If this option is taken, all subsequent changes in fair value are recognized in other comprehensive income with no recycling of gains or losses to the consolidated statement of income. Dividend income would continue to be recognized in the consolidated statement of income.

An entity is only permitted to designate a financial asset otherwise meeting the amortized cost criteria at FVTPL if doing so significantly reduces or eliminates an accounting mismatch. This designation is made on initial recognition and is irrevocable.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Financial assets which contain embedded derivatives are to be classified in their entirety either at fair value or amortized cost depending on whether the contracts as a whole meet the relevant criteria under IFRS 9.

Most of IAS 39's requirements for financial liabilities are retained, including amortized cost accounting for most financial liabilities. The guidance on separation of embedded derivatives will continue to apply to host contracts that are financial liabilities. However, fair value changes attributable to changes in credit risk for financial liabilities designated under the fair value option, other than loan commitments and financial guarantee contracts, are to be presented in the statement of other comprehensive income unless the treatment would create or enlarge an accounting mismatch in profit or loss. These amounts are not subsequently reclassified to the statement of income but may be transferred within members' equity.

The second and third phases in IASB's project to replace IAS 39 will address the impairment of financial assets measured at amortized cost and hedge accounting. In addition, the IASB is working with the US Financial Accounting Standards Board to reduce inconsistencies between US GAAP and IFRS in accounting for financial instruments. The impact of IFRS 9 may change as a consequence of further developments resulting from the IASB's project to replace IAS 39. As a result, it is impracticable to quantify the impact of IFRS 9 as at the date of publication of these consolidated financial statements.

ii) *IFRS 13, Fair Value Measurement*

IFRS 13, *Fair Value Measurement*, ("IFRS 13") was issued on May 12, 2011. IFRS 13 defines fair value, establishes a framework for measuring fair value, and sets out disclosure requirements for fair value measurements. IFRS 13 explains how to measure fair value when it is required by other IFRS'. It does not introduce new fair value measurements, nor does it eliminate the practicability exceptions to fair value measurements that currently exist in certain standards. Prior to the introduction of IFRS 13, there was no single source of guidance on fair value measurement and inconsistencies in guidance added to the complexity of financial reporting.

The standard is effective for annual periods beginning on or after January 1, 2013. IFRS 13 is required to be applied prospectively.

Fair value is measured as an exit price, with measurement considering characteristics of the asset or liability and not entity-specific characteristics, as well as assuming a transaction takes place in the entity's principal (or most advantageous) market between market participants. Price is not adjusted for transaction costs, and measurement maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs.

Measurement of non-financial assets is based on highest and best use of the asset. Measurement of net exposures for financial assets and liabilities with offsetting risks is allowed in limited circumstances.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Where liabilities and an entity's own equity instruments are recorded at fair value, quoted prices are used if available; if not, then quoted prices for an identical item held as an asset are used before resorting to other valuation techniques.

Fair value hierarchy disclosures are extended to non-financial assets and liabilities measured at fair value. There is also a requirement to disclose the effect on profit or loss for recurring fair value measurements categorized within Level 3, as well as information about fair value to be disclosed for items not measured at fair value but for which fair value is disclosed. Management is currently assessing the impact this standard will have on the Credit Union's financial statements.

iii) *IFRS 12, Disclosure of Interests in Other Entities*

*IFRS 12, Disclosure of Interests in Other Entities*, effective January 1, 2013, establishes disclosure requirements for interests in other entities, such as subsidiaries, joint arrangements, associates, and unconsolidated structured entities. The standard carries forward existing disclosures and also introduces significant additional disclosure that address the nature of, and risks associated with, an entity's interests in other entities. The adoption of this standard may expand the Credit Union's disclosures in its consolidated financial statements regarding its interests in its wholly owned subsidiaries.

iv) *IAS 19, Employee Benefits*

*IAS 19, Employee Benefits*, effective January 1, 2013, has been amended to make significant changes to the recognition and measurement of defined benefit pension expense and termination benefits and to enhance the disclosure of all employee benefits. The amended standard requires immediate recognition of actuarial gains and losses in other comprehensive income as they arise, without subsequent recycling to net income. This is consistent with the Credit Union's current accounting policy. Past service cost (which will now include curtailment gains and losses) will no longer be recognized over a service period but instead will be recognized immediately in the period of a plan amendment. Pension benefit cost will be split between:

- (1) the cost of benefits accrued in the current period (service cost) and benefit changes (past-service cost, settlements and curtailments); and
- (2) finance expense or income. The finance expense or income component will be calculated based on the net defined benefit asset or liability.

A number of other amendments have been made to recognition, measurement and classification including redefining short-term and other long-term benefits, guidance on the treatment taxes related to benefit plans, guidance on risk/cost sharing features, and expanded disclosures. The adoption of this standard will result in changes to the Credit Union's pension and other retirement benefits note disclosure.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

### December 31, 2012

---

(expressed in thousands of dollars)

v) *IAS 1, Presentation of Financial Statements*

IAS 1, *Presentation of Financial Statements*, has been amended to require entities to separate items presented in other comprehensive income into two groups, based on whether or not items may be recycled in the future. Entities that choose to present other comprehensive income items before tax will be required to show the amount of tax related to the two groups separately. The amendment is effective for annual periods beginning on or after July 1, 2012 with earlier application permitted. The adoption of this standard may result in changes to the Credit Union's disclosure of other comprehensive income.

vi) *IFRS 7, Financial Instruments: Disclosures*

IFRS 7, *Financial Instruments: Disclosures*, has been amended to enhance disclosure requirements related to offsetting of financial assets and financial liabilities. The amendment does not change the current offsetting model in IAS 32 which only allows for the right of offset when the entity has a legally enforceable right of set-off and intends to either settle the asset and liability on a net basis or to realize the asset and settle the liability simultaneously. These new disclosures are intended to facilitate comparison between those entities that prepare IFRS financial statements to those that prepare financial statements in accordance with US GAAP. The amendment is effective for annual periods beginning on or after January 1, 2013 and must be applied retrospectively. The adoption of this standard will result in additional disclosures to the Credit Union's financial statements.

vii) *IFRS 10, Consolidated Financial Statements*

IFRS 10, *Consolidated Financial Statements* is a new standard that will replace the guidance on control and consolidation in IAS 27, *Consolidated and Separate Financial Statements*, and SIC-12, *Consolidation Special Purpose entities*. IFRS 10 changes the definition of control so the same criteria are applied to all entities to determine control. The standard is effective for annual periods beginning on or after January 1, 2013 with earlier application permitted. The adoption of this standard is not expected to result in a change to the Credit Union's financial statements.

viii) *IAS 32, Financial Instruments: Presentation*

IAS 32, *Financial Instruments: Presentation*, has been amended to clarify requirements for offsetting of financial assets and financial liabilities on the statement of financial position. The amendments do not change the current offsetting model in IAS 32 which only allows for the right of offset when the entity has a legally enforceable right of set-off and intends to either settle the asset and liability on a net basis or to realize the asset and settle the liability simultaneously. These new disclosures are intended to facilitate comparison between those entities that prepare IFRS financial statements to those that prepare financial statements in accordance with US GAAP. The standard is effective for annual periods beginning on or after January 1, 2014 and must be applied retrospectively. The adoption of this standard is not expected to result in a change to the Credit Union's financial statements.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

### 4 Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Credit Union's accounting policies. Changes in assumptions may have a significant impact on the financial statements in the period the assumptions changed. The principal areas involving a higher degree of judgment or complexity and/or areas which require significant estimates are described below:

a) Allowance for credit losses on loans to members

The Credit Union regularly reviews its loan portfolio for impairment. In determining whether an impairment loss should be recorded in the consolidated statement of income, the Credit Union makes judgments as to whether there is any observable data indicating an impairment trigger followed by a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of members in a group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed annually to reduce any difference between loss estimates and actual loss experience. Were the net present value of estimated cash flows to differ by +/-1%, the impairment loss is estimated to be \$94 (2011 - \$111) higher or lower.

b) Fair value of financial instruments

The fair values of financial instruments where no active market exists or where quoted prices are not otherwise available are determined using specific valuation techniques. In these cases, the fair values are estimated from observable data in respect of similar financial instruments or by using models. Where market observable inputs are not available, they are estimated based on appropriate assumptions. Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by management. To the extent practical, models use only market observable data; however, areas such as credit risk (both the Credit Union's credit risk and counterparty risk) and correlations require management to make estimates.

c) Securitizations and derecognition of transferred financial instruments

The Credit Union transfers residential mortgages to an independent third party either directly or through an initial transfer to intermediary financial institutions that are eligible, authorized transferors approved by the third party.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Depending on the contractual arrangements, the Credit Union may not derecognize the securitized residential mortgages and may instead recognize a secured borrowing; recognize only a portion of the assets up to the Credit Union's remaining involvement in those assets; or may derecognize the assets and recognize, as separate assets or liabilities, any rights and obligations constituted or retained in the transfer. In assessing the derecognition criteria, management is often required to make judgments as to the extent to which cash flows are transferred and any continuing exposure to risks and rewards of the transferred receivables. The Credit Union has disclosed the accounting treatment for securitization transactions during the year in note 6.

d) Retirement benefits

The present value of retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of pension obligations.

The assumptions used in determining the net cost for retirement benefit plans include the discount rate. The Credit Union determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Credit Union considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension liability. Other key assumptions for pension obligations are based in part on current market conditions.

e) Income taxes

The Credit Union computes an effective tax rate which includes an evaluation of the small business rate eligible to credit unions under the Canadian Income Tax Act. This small business rate applies until the tax paid retained earnings reach five percent of amounts owing to members, including deposits and shares. An estimate of deposit, share and income growth, based on the modeling of the Credit Union's business plan, inclusive of economic indicators, provides the basis in determining the small business rate.

This rate forms the effective tax rate used in computing the income tax provision. However, the actual amounts of income tax expense do not become final until the filing and acceptance of the income tax return by the relevant tax authorities, which occurs subsequent to the issuance of the consolidated financial statements. To the extent that estimates differ from the final tax returns, income tax expense would be affected in the subsequent year.

The Credit Union periodically assesses its liabilities and contingencies related to income taxes for all years open to audit based on the latest information available. For matters where it is probable that an adjustment will be made, the Credit Union records its best estimate of the tax liability including the related interest and penalties in the current tax provision.

**Prospera Credit Union**  
Notes to Consolidated Financial Statements  
December 31, 2012

(expressed in thousands of dollars)

**Loans to members individually impaired**

A loan is considered impaired when a counterparty has not made a payment by the contractual due date and an individual allowance for credit has been established. The following table presents the carrying value of loans that are individually impaired:

	2012 \$	2011 \$
Retail		
Residential mortgages	1,520	1,697
Personal loan	341	392
Commercial mortgages and loans	2,351	2,636
	4,212	4,725

**Loans past due but not impaired**

A loan is considered past due when a counterparty has not made a payment by the contractual due date. The following table presents the carrying value of loans that are past due but not classified as impaired because they are either:

- (i) less than 90 days past due and there is no information that an impairment event has occurred; or
- (ii) fully secured and collection efforts are reasonably expected to result in repayment.

Loans that are past due but not impaired are as follows:

	2012			2011	
	1-29 days \$	30-89 days \$	90 days and greater \$	Total \$	Total \$
Retail					
Residential mortgages	20,558	2,909	1,944	25,411	31,449
Personal loans	790	894	-	1,684	2,382
Commercial mortgages and loans	2,310	1,429	82	3,821	5,677
	23,658	5,232	2,026	30,916	39,508

The fair value of the collateral held by the Credit Union as security for impaired and past due loans was \$77,452 (2011 - \$79,838). The Credit Union has estimated the fair value of collateral based on an updated assessment of the security appraisals undertaken at the original funding assessment or management's knowledge of the fair value of security.

The principal collateral and other credit enhancements the Credit Union holds as security for loans include:

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

- (i) insurance and mortgages over residential lots and properties;
- (ii) recourse to business assets such as real estate, equipment, inventory and accounts receivable;
- (iii) recourse to the commercial real estate properties being financed; and
- (iv) recourse to liquid assets, guarantees and securities.

Valuations of collateral are updated periodically depending on the nature of the collateral. The Credit Union has policies in place to monitor the existence of undesirable concentration in the collateral supporting its credit exposure.

### **6 Loan securitizations and other transfers**

#### **Transferred financial assets that are not derecognized in their entirety**

The Credit Union securitizes insured residential mortgages by participating in the National Housing Authority ("NHA") CMB and MBS programs. Through the programs, the Credit Union issues securities backed by residential mortgages that are insured against borrower's default. Once the mortgages are securitized, the Credit Union assigns underlying mortgages and/or related securities to CMHC.

During the year, the Credit Union entered into transfer agreements which were reviewed in order to determine whether the transfers of financial assets should result in all or a portion of the transferred mortgages being derecognized from its consolidated statement of financial position. The derecognition requirements include an assessment of whether the Credit Union's rights to contractual cash flows have expired or have been transferred or whether an obligation has been undertaken by the Credit Union to pay the cash flows collected on the underlying transferred assets over to a third party. The derecognition standards also include an assessment of whether substantially all the risks and rewards of ownership have been transferred.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

(expressed in thousands of dollars)

The Credit Union has determined that an amount of \$60,908 (2011 - \$20,824) raised from securitization transactions during the year should be accounted for as a secured borrowing as the Credit Union did not transfer substantially all of the risks and rewards of ownership, principally because it did not transfer prepayment, interest and credit risk of the mortgages in the securitization. At December 31, 2012, the Credit Union had \$73,365 (2011 - \$18,721) of residential mortgages which had been securitized and included on the balance sheet as the securitization transaction did not meet the requirements for derecognition. The total carrying amount of the original loans securitized as at December 31, 2012 was \$81,732 (2011 - \$20,824). These loans are held as security for the secured borrowing (note 11). As a result of the transactions, the Credit Union receives the net differential between the monthly interest receipts of the mortgages and the interest expense on the borrowings. The exposure to variability of future interest income and expense has been incorporated into the Credit Union's interest rate sensitivity calculations in note 21.

	<u>Loans and receivables</u>	
	<u>2012</u>	<u>2011</u>
Carrying amount of assets	79,544	20,824
Carrying amount of associated liabilities	(79,544)	(20,824)
<b>For those liabilities that have recourse only to the transferred assets:</b>		
Fair value of assets	80,000	20,698
Fair value of associated liabilities	(80,811)	(21,924)
Fair value of associated derivatives	608	726
<b>Net position</b>	<u>(203)</u>	<u>(500)</u>

### Transferred financial assets that are derecognized

For securitization transactions initiated prior to transition to IFRS, the Credit Union entered into an agreement with Central 1 to sell Canada Mortgage and Housing Corporation ("CMHC") insured mortgages for participation in the Canada Mortgage Bond Program, which are used by Central 1 to create mortgage-backed securities sold to Canada Mortgage Housing Trust, an independent special purpose entity.

The Credit Union's retained interests in securitized loans consist of a right to receive future cash flows arising after the investors in the special purpose entity have received the return for which they contracted and from credit enhancement provided to the special purpose entity in the form of cash collateral accounts. The investors and special purpose entities, as holders of the securitized mortgages, have recourse only to a cash collateral account, the mortgages securitized and cash flows from the securitized mortgages. The investors and the third parties have no recourse to the Credit Union's other assets for failure of debtors to pay when due. The Credit Union's retained interests are subject to credit, prepayment and interest rate risks on the securitized mortgages.

The fair value of retained interests amounted to \$152 (note 9) at December 31, 2012 (2011 - \$572). The carrying value of recognized servicing liabilities amounted to \$30 at December 31, 2012 (2011 - \$99).

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

(expressed in thousands of dollars)

As part of these securitizations of mortgages receivable, the Credit Union retained servicing responsibilities. Servicing liabilities amortized to income during the year amounted to \$69 (2011 - \$68) and retained interest recognized to income during the year amounted to \$36 (2011 - \$260).

### Undiscounted cash flows to repurchase transferred assets that are derecognized

Due in 2012	1.589	-	48,000
Due in 2013	1.530	89,959	-
Due in 2014	1.500	21,758	-
Due in 2016	2.550	30,434	21,924
Due in 2017	1.700	28,619	-
		<hr/>	<hr/>
		170,770	69,924
Current		89,959	48,000
Non-current		80,811	21,924

As of December 31, 2012, the Credit Union has two approved lines of credit totalling \$190,924 (2011 - \$190,100).

Security provided as collateral for the line of credit facilities is a general assignment of loans to members, accounts receivable and a demand debenture in favour of Central 1.

The secured borrowings arise from securitization transactions and are secured by specific pools of loans to members of \$73,365 (2011 - \$18,721) and \$4,438 (2011 - \$2,077) of government backed securities (notes 6 and 7).

## 12 Member deposits

	2012 \$	2011 \$
Term deposits	1,074,297	1,060,207
Demand deposits	565,672	525,725
Registered savings plans	355,386	340,800
Member deposit shares (note 13(b))	19,231	19,401

### 14 Pension and other retirement benefits

The Credit Union provides pension benefits to employees through defined contribution, defined benefit, and supplemental retirement and multi-employer defined benefit plans. Other post-retirement benefits including health care, dental benefits or cash alternatives are provided to eligible Credit Union employees upon or after retirement.

The Credit Union funds the defined benefit plans and multi-employer defined benefit plans based on actuarially prescribed amounts. The unfunded supplemental retirement and non-pension benefits are paid by the Credit Union at the time of entitlement. Retirement benefits for the defined contribution plans are paid by the Credit Union on a monthly basis. The unfunded portion of the defined benefit obligation is \$3,708 (2011 - \$3,705). The accrued benefit obligation for the supplemental retirement plan is secured by an irrevocable letter of credit issued by the Credit Union in the amount of \$2,613 (2011 - \$2,238).

The accrued benefit obligation and plan assets were actuarially measured for accounting purposes as of December 31, 2012. The effective date of the last actuarial valuation report for funding purposes was December 31, 2009 and the effective date of the next required actuarial valuation report will be December 31, 2012.

Variation of the effect of the limit of paragraph 58(b)	-	-	231
Employer contributions	987	983	920
Benefit payments	(923)	(847)	(525)
Fair value of plan assets at December 31	14,679	13,524	12,801

ii) Funded plan assets comprise the following:

Asset category	Funded defined benefit plans	
	2012 %	2011 %
Equity securities	52	55
Debt instruments	37	35
Other assets	11	10
	100	100

Investments are well diversified, such that the failure of any single investment would not have a material impact on the overall level of assets. The largest proportion of assets is invested in equities, although the Credit Union also invests in properties, bonds and cash.

The expected return on plan assets is determined by considering the expected returns available on the assets underlying the current investment policy. Expected yields on fixed interest investments are based on gross redemption yields as at the date of the consolidated statement of financial position. Expected returns on equity and property investments reflect long-term rates of return experienced in the respective markets. The actual return on plan assets for the year ended December 31, 2012 was \$1,091 (2011 - \$587).

**Prospera Credit Union**  
Notes to Consolidated Financial Statements  
December 31, 2012

---

(expressed in thousands of dollars)

c) The amounts recognized in the consolidated statement of income were as follows:

	<u>Defined benefit plans</u>	
	2012	2011
	\$	\$
Current service cost (net of employee contributions)	700	695
Interest costs	1,032	959
Expected return on plan assets	(928)	(855)
Amortization of past service cost	4	4
	<hr/>	<hr/>
Total included in employee benefits expense (note 17)	808	803
	<hr/>	<hr/>

d) The amounts recognized in other comprehensive income (loss) were as follows:

	<u>Defined benefit plans</u>	
	2012	2011
	\$	\$
Actuarial losses in the year	(2,494)	(2,484)
Income tax recovery	336	335
	<hr/>	<hr/>
Other comprehensive loss related to defined benefit plans for the year	(2,158)	(2,149)
	<hr/>	<hr/>

e) The principal actuarial assumptions used were as follows:

	<u>Defined benefit plans</u>	
	2012	2011
	%	%
Discount rate	4.48	5.23
Inflation rate	2.00	2.00
Expected long-term rate of return on plan assets	6.31	6.66
Future salary increases	3.00	3.00
Health care cost		
Extended health	8.00	7.00
MSP	4.00	6.00
Dental	3.00	3.00

For plans or portion of plans where indexing is used, future pension increase assumptions are based on 50% of the inflation rate.

The expected long-term rate of return on assets is determined based on long-term forecasted returns of the major asset classes, weighted by the plans' target asset allocation.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Assumptions regarding future mortality experience are set based on actuarial advice in accordance with published statistics and experience. Mortality assumptions are based on the 1994 Uninsured Pensioner Mortality Table with projection for future mortality improvements for 20 years. The projection factors are in accordance with the published table Scale AA where annual improvements range from 0.4% to 2% for males and 0.3% to 1.8% for females.

The tables translate the average life expectancy of males to 20 years and females to 22 years for a pensioner retiring at age 65.

The sensitivity to changes in the weighted principal assumptions is as follows:

	Defined benefit plans	
	2012 %	2011 %
Discount rate		
Impact of: 1% increase	(3,645)	(2,953)
1% decrease	4,704	3,788
Future salary increases		
Impact of: 1% increase	1,178	869
1% decrease	(1,037)	(767)
Medical/dental trends		
Impact of : 1% increase	127	238
1% decrease	(110)	(200)

f) Participation in multi-employer plan (the "Plan")

The Credit Union participates in a plan for certain eligible employees which is administered by Central 1.

An actuarial valuation of the overall Plan was carried out as at December 31, 2009. It was determined that the overall Plan had an actuarial deficit of \$34,145 using the projected unit credit method. As a result of the valuation, the contribution rates were determined to be 8.9% per annum for employer contributions based on the pensionable earnings of the respective participating employees and 2.5% to 9% per annum, depending on the planholder's age, for employee contributions for the period from January 1, 2010 to December 31, 2012. The next actuarial valuation will be completed as of December 31, 2012. The new valuation of the Plan is expected to show a solvency deficiency. As a result, it is expected that contribution rates will be increased; the contributions will continue to be expensed as invoiced by the Plan.

Reconciliation of effective tax rate

Deferred taxes are calculated on all temporary differences under the liability method using an effective tax rate. The income tax expense differs from the amount that would be computed by applying the combined federal and provincial statutory income tax rates of 25% (2011 - 26.5%) to income before income taxes. The reasons for the differences are as follows:

	2012 \$	2011 \$
Computed tax expense	2,198	4,452
(Decrease) increase resulting from		
Preferred rate amount deduction for credit unions	(1,044)	(2,088)
Non-taxable items	16	(963)
Effect of tax rate changes and changes in income tax asset	193	903
Other	(611)	93
	<u>752</u>	<u>2,397</u>

The weighted average applicable tax rate was 8.6% (2011 - 14.3%). The decrease was a result of adjustments to the prior year tax return and provision adjustments due to more accurate information available at the time of filing the return.

Deferred income tax assets and liabilities analysis are as follows:

	2012 \$	2011 \$
Deferred income tax assets		
To be recovered within 12 months	(30)	252
To be recovered after more than 12 months	2,213	1,555
	<u>2,183</u>	<u>1,807</u>
Deferred income tax liabilities		
To be settled within 12 months	284	213
To be settled after more than 12 months	426	348
	<u>710</u>	<u>561</u>
Net deferred income tax assets	<u>1,473</u>	<u>1,246</u>

## 20 Commitments and contingent liabilities

### Commitments

#### *Leases*

Most of the Credit Union's premises are leased for varying terms. Lease payments included in occupancy expense amounted to \$5,361 (2011 - \$5,103). Current minimum annual payments are approximately \$5,629 (2011 - \$4,948) for each of the next five years and \$18,272 (2011 - \$21,136) in aggregate thereafter.

#### *Letters of credit and other guarantees*

In the normal course of business, the Credit Union has outstanding letters of credit issued on behalf of members totalling \$9,847 (2011 - \$8,958), which are secured by member term deposits or property mortgages.

#### *Undrawn loan commitment to members*

Refer to note 21.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

### Contingent liabilities

In the course of its business, various claims and legal proceedings may arise against the Credit Union. The Credit Union defends itself where appropriate and is currently of the opinion that it is likely to prevail; accordingly, no provision has been made in these financial statements.

## 21 Risk management

The Credit Union's risk management policies are designed to identify and analyze risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Credit Union follows an enterprise risk management framework, which involves identifying particular events or circumstances relevant to its objectives, assessing them in terms of probability and magnitude, determining a response strategy and monitoring progress. The Credit Union regularly reviews its risk management policies and systems to take account of changes in markets, products and emerging best practice.

Risk management is carried out by a number of delegated committees reporting to the Board. The Board provides written principles for risk tolerance and overall risk management, and management reports to the Board on compliance with the risk management policies of the Credit Union. In addition, the Credit Union maintains an internal audit function, which is responsible for independent review of risk management and the Credit Union's control environment.

Financial instruments comprise the majority of the Credit Union's assets and liabilities. The Credit Union accepts deposits from members at both fixed and floating rates for various periods and seeks to earn an interest rate margin by investing these funds in high quality financial instruments - principally mortgages. The primary types of financial risk that arise from this activity are credit risk, liquidity risk, interest rate risk, foreign exchange risk and price risk.

The following table describes the significant financial instrument activity undertaken by the Credit Union, the risks associated with such activities and the method used in managing those risks:

<b>Activity</b>	<b>Risk</b>	<b>Method</b>
Fixed rate savings products and funding activities involving fixed rate instruments	Sensitivity to changes in interest rates	Asset-liability matching and periodic use of derivatives
Fixed rate mortgages	Sensitivity to changes in interest rates	Asset-liability matching and periodic use of derivatives
Index-linked deposit products	Sensitivity to changes in Canadian equity indices	Options
Foreign currencies	Sensitivity to changes in foreign currency	Asset-liability matching and investment limits

(expressed in thousands of dollars)

### Credit risk

Credit risk is the risk of a financial loss occurring due to a Credit Union member's or counterparty's inability or refusal to fully honour the contractual obligations of a financial instrument. This risk results from being a party to a financial instrument with a counterparty. Allowances for credit losses are made for losses that have been incurred at the statement of financial position date. Significant changes in the economy of British Columbia, specifically the Greater Vancouver, Fraser Valley and Okanagan areas, or deteriorations in lending sectors that represent a concentration within the Credit Union's loan portfolio may result in losses that are different from those provided for at the statement of financial position date.

The classes of financial instruments to which the Credit Union is most exposed are loans to members, cash resources and derivatives. The following table presents the maximum exposure to credit risk of financial instruments including undrawn commitments of \$290,858 (2011 - \$264,734):

Credit risk exposure			2012	2011
	Outstanding \$	Undrawn commitments \$	Total exposure \$	Total exposure \$
Cash and cash equivalents	19,250	-	19,250	29,078
Interest bearing deposits with financial institutions	154,484	-	154,484	147,229
Residential				
Mortgages	1,245,643	27,823	1,273,466	1,136,649
Loans	92,141	257	92,398	87,215
Line of credit and overdraft	202,202	182,312	384,514	386,289
Commercial				
Mortgages	461,756	32,750	494,506	453,018
Loans	66,023	537	66,560	47,539
Line of credit and overdraft	37,861	47,179	85,040	85,740
Accrued interest on loans	3,823	-	3,823	3,843
Derivatives	3,134	-	3,134	3,691
Retained interest in securitized loans	152	-	152	572
Accounts receivable	1,189	-	1,189	1,163
Income taxes receivable	619	-	619	-
Total exposure	2,288,277	290,858	2,579,135	2,382,026

Management of credit risk is an integral part of the Credit Union's activities. Management carefully monitors and manages the Credit Union's exposure to credit risk by a combination of methods. Credit risk arises principally from lending activities that result in member loans and advances and treasury activities that result in investments in cash resources. There is also credit risk in unfunded loan commitments. The overall management of credit risk is centralized in the Investment and Lending Committee, which reports to the Board, and the respective operating units of the Credit Union.

Concentration of loans is managed by the implementation of sectoral and member specific limits as well as the periodic use of syndications with other financial institutions to limit the potential exposure to any one member.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

### December 31, 2012

---

(expressed in thousands of dollars)

The Investment and Lending Committee is responsible for approving and monitoring the Credit Union's tolerance for credit exposures, which it does through review and approval of the Credit Union's lending policies and through setting limits on credit exposures to individual members and across sectors. The Credit Union maintains levels of borrowing approval limits, and prior to advancing funds to a member, an assessment of the credit quality of the member is made. The Credit Union emphasizes responsible lending in its relationships with members and establishes that loans are within the member's ability to repay, rather than relying exclusively on collateral.

Loans to members consist of \$1,245,643 (2011 - \$1,120,302) residential loans which are secured by residential property, with a further \$205,584 (2011 - \$214,971) secured by personal loans. Loans to members also include \$88,759 (2011 - \$79,184) of unsecured loans, which principally consist of personal loans and lines of credit.

The Credit Union often takes security as collateral in common with other lending institutions. The Credit Union maintains guidelines on the acceptability of specific types of collateral. Collateral may include mortgages over residential properties and charges over business assets such as premises, inventory and accounts receivable. Where significant impairment indicators are identified, the Credit Union will take additional measures to manage the risk of default, which may include seeking additional collateral.

For the retail loan portfolio (residential and consumer loans), the Credit Union's underwriting methodologies and risk modelling is member based rather than product based. The Credit Union reviews the member's capacity to repay the loan rather than relying exclusively on collateral, although it is an important mitigant of establishing credit risk. Decisions on consumer loans are based on an overall assessment of credit risk utilizing a scoring model that takes into account factors such as Beacon scores and debt levels relative to income.

The credit quality of the commercial loan portfolio for those loans that are neither past due nor impaired can be assessed by reference to the Credit Union's internal rating system. The Credit Union assesses the quality of commercial loans using an internal rating tool taking into consideration a number of factors, such as the security, the borrower's management performance, current and projected financial results and industry statistics related to the borrower's industry and utilizes the experience and judgment of the Credit department. Commercial loans are divided into segments based on the following rating system and are regularly reviewed and updated as appropriate:

<b>Risk rating</b>	<b>Risk rating descriptions</b>
1 - 2	Excellent to very good - account is identified to be low or normal risk, requires minimal staff oversight and has a low risk of default
3	Satisfactory - account has acceptable levels of risk with a potential for a heavier reliance on asset security. Staff maintain a certain level of oversight based on assessment factors and industry business practices
4 - 5	Less than satisfactory to poor - management involvement is required as account is identified to be of higher risk driven by a material adverse change, deterioration of the financial situation of the member or major security deficiency

**Prospera Credit Union**  
Notes to Consolidated Financial Statements  
December 31, 2012

---

(expressed in thousands of dollars)

The commercial loan portfolio for those loans that are neither past due nor impaired is as follows:

Risk rating	2012 \$	2011 \$
1 - 2	16,371	10,130
3	534,027	485,781
4 - 5	9,236	13,255
	559,634	509,166

Credit risk within the Treasury department arises from the investments in cash resources held by the Credit Union to meet regulatory and internal liquidity requirements and for general business purposes. This aspect of credit risk is principally managed by the Treasury department, which reports to the Investment and Lending Committee. The Treasury department managed assets consist of cash resources and interest bearing deposits with financial institutions held with Central 1.

**Liquidity risk**

Liquidity risk is the risk that the Credit Union will encounter difficulty in raising funds to meet its obligations to members and other liabilities. To mitigate this risk, the Credit Union is required by the FIA to maintain a minimum liquidity threshold at all times, based on total members' deposits and non-equity shares. At December 31, 2012, the Credit Union's liquidity exceeded the required level. Included in cash and cash equivalents and interest bearing deposits with financial institutions are minimum liquidity threshold cash resources of \$175,724 (2011 - \$161,284). The Credit Union's own risk management policies require it to maintain sufficient liquid resources to cover cash flow imbalances, to retain member confidence in the Credit Union and to enable the Credit Union to meet all financial obligations. This is achieved through maintaining a prudent level of liquid assets, through management control of the growth of the loan portfolio, securitizations and asset-liability maturity management techniques. Management monitors rolling forecasts of the Credit Union's liquidity requirements on the basis of expected cash flows as part of its liquidity management. The Credit Union also maintains borrowing facilities of \$190,924 as an integral part of its liquidity management strategy, as disclosed in note 11.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Cash flows payable under financial liabilities which represents the Credit Union's exposure to liquidity risk by remaining contractual maturities are as follows:

	Less than 1 year \$	1 - 3 years \$	4 - 5 years \$	Total \$
<b>December 31, 2012</b>				
Member deposits	1,396,501	537,320	95,667	2,029,488
Borrowings

Borrowings				
Money market loans	48,000	-	-	48,000
Secured borrowings	-	-	21,924	21,924

### Market risk

#### *Interest rate risk*

Cash flow interest rate risk is the risk that the future cash flows of the Credit Union's financial instruments will fluctuate due to changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in prevailing market interest rates. Net interest income reported in the consolidated statement of income may increase or decrease in response to changes in market interest rates. Accordingly, the Credit Union sets limits on the level of mis-match of interest rate repricing that may be undertaken, which is monitored by the Credit Union's Treasury department and reported to the Asset and Liability Committee ("ALCO"), which is responsible for managing interest rate risk.

In managing interest rate risk, the Credit Union relies primarily upon the use of asset-liability and interest rate sensitivity simulation models. Periodically, the Credit Union may enter into interest rate swaps to adjust the exposure to interest rate risk by modifying the repricing of the Credit Union's financial instruments. The Credit Union's derivative instruments are disclosed in note 23.

Sensitivity analysis is used to assess the change in value of the Credit Union's financial instruments against a range of incremental basis point changes in interest rates over a 12-month period. Interest rate shock analysis is calculated in a similar manner to sensitivity analysis but involves a more significant change of 100 basis points or greater in interest rates. Sensitivity analysis and interest rate shock analysis are calculated on a monthly basis and are reported to the ALCO. Based on current differences between financial assets and financial liabilities as at December 31, 2012, the Credit Union estimates that an immediate and sustained 100 basis point increase in interest rates would increase net interest income by \$1,787 (2011 - \$2,047) over the next 12 months while an immediate and sustained 100 basis point decrease in interest rates would decrease net interest income by \$2,363 (2011 - \$2,570) over the next 12 months.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

Other types of interest rate risk may involve basis risk. The risk of loss arising from changes in the relationship of interest rates that have similar but not identical characteristics, for example the difference between prime rates and the Canadian Deposit Offering Rate (“CDOR”), and prepayment risk (the risk of loss of interest income arising from the early repayment of fixed rate mortgages and loans) are also monitored on a regular basis and are reported to the ALCO.

The carrying amounts of interest-sensitive assets and liabilities are presented in the periods in which they next reprice to market rates or mature and are summed to show the interest rate and maturity gap.

The gap position presented below represents the position outstanding at the close of the business day and may change significantly in subsequent periods based on member behaviour and the application of the Credit Union’s asset and liability management policies.

### *Assets*

Fixed term assets, such as residential mortgage loans and consumer loans, are reported based on scheduled repayments.

Assets that are related to the Credit Union’s prime rate or other short-term market rates are reported in the variable rate category.

### *Liabilities*

Fixed rate liabilities, such as term deposits, are reported at scheduled maturity.

Interest bearing deposits on which the member interest rate changes with prime or other short-term market rates are reported within variable rate category.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

### *Foreign exchange risk*

Foreign exchange risk is not considered significant at this time as the Credit Union does not engage in any active trading of foreign currency positions or hold significant foreign currency denominated financial instruments for an extended period. Foreign currency denominated deposits are matched with foreign currency denominated liquidity to minimize any exposure. Foreign exchange revenues earned by the Credit Union are primarily generated by crystallized spreads on dollars exchanged with members.

### *Price risk*

The Credit Union is not exposed to significant other price risk.

## **22 Capital management**

The FIA requires the Credit Union to maintain, at all times, a capital base which is adequate in relation to its business. Capital levels for credit unions in British Columbia are regulated pursuant to guidelines issued by the Financial Institutions Commission of British Columbia ("FICOM"). Minimum capital standards are based on a total capital to risk weighted assets ("RWA") ratio of 8%, along with a requirement that at least 35% of the capital base consist of retained earnings. The Credit Union met this requirement throughout 2012 and 2011. Capital is managed in accordance with policies established by the Board. Management regards a strong capital base as an integral part of the Credit Union's strategy. The Credit Union has a capital plan to provide a long-term forecast of capital requirements. All of the elements of capital are monitored throughout the year, and modifications of capital management strategies are made as appropriate.

The capital ratio is calculated by dividing total capital by RWA, which is the assets weighted according to relative risk (0% to 150%) as determined by FICOM's prescribed rules relating to on-statement of financial position and off-statement of financial position exposures.

The total capital is as follows:

	<b>2012</b>	<b>2011</b>
	<b>\$</b>	<b>\$</b>
Equity shares	10,591	13,393
Retained earnings	96,551	90,924
Deferred income tax assets	(1,411)	(1,215)
50% of the Credit Union's proportion of retained earnings in CUDIC, Central 1 and Stabilization Central Credit Union as advised by FICOM	15,245	13,333
Deductions from capital	(731)	(623)
	<hr/>	<hr/>
	120,245	115,812

**23 Derivative financial instruments**

The table below provides an analysis of the Credit Union's derivative-related credit exposure:

	2012		2011	
	Notional amount \$	Fair value \$	Notional amount \$	Fair value \$
Equity options	17,387	1,249	17,889	1,194
Interest rate swaps	97,000	1,885	173,036	2,497
		<u>3,134</u>		<u>3,691</u>

Notional amounts are the contract amounts used to calculate the cash flows to be exchanged; they do not represent credit or market risk exposure.

Fair values based on quoted market prices are not available for a significant portion of the Credit Union's derivative instruments. Consequently, fair values are derived using present value and other valuation techniques and may not be indicative of the net realizable values.

The following is a summary of the nature of derivative instruments utilized:

- a) Interest rate swaps are transactions in which two parties exchange interest flows on a specified notional amount for a predetermined period, based on agreed upon fixed and floating rates. Notional amounts are not exchanged.

The Credit Union hedges a portion of the interest rate risk that arises on variable interest cash flows on prime rate mortgages through interest rate derivatives. Interest income and expense include the release from other reserves of gains or losses relating to the effective portion of qualifying hedging derivatives designated as cash flow hedges either:

- i) as the hedged item is recorded in interest income (expense); or
- ii) when the forecasted cash flow of the hedged item is no longer probable.

Any ineffectiveness in the hedging relationship is recorded directly in the consolidated statement of income.

During the year ended December 31, 2012, \$512 (net of tax of \$80) (2011 - \$1,111 (net of tax of \$173)) was the effective portion of changes in fair value for cash flow hedges in the year. The amount transferred to the consolidated statement of income was \$138 (net of tax of \$22) (2011 - \$171 (net of tax of \$27)).

Consolidated other comprehensive income contains \$nil (2011 - \$876 (net of tax of \$137)) in unrealized net gains on derivatives.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

From time to time, the Credit Union enters into derivative transactions to economically hedge certain business strategies that do not otherwise qualify for hedge accounting, or where hedge accounting is not considered economically feasible to implement. During the year ended December 31, 2012, (\$197) (2011 - \$590) was recorded in net interest income as unrealized changes in fair value of these derivatives. In addition, net interest income contains \$862 (2011 - \$824) in realized net gains of which \$751 (2011 - \$nil) was released from other comprehensive income.

- b) Index-linked call options are equity contracts to pay or receive cash flows based on the increase or decrease in the underlying index or security. The Credit Union utilizes index-linked option contracts in order to economically hedge interest expense on the equity index-linked deposits.

The fair value of all outstanding derivative contracts in a gain position, which takes into account credit risk without factoring in the impact of master netting agreements, totalled \$3,134 as at December 31, 2012 (2011 - \$3,873). The Credit Union manages this credit risk by dealing with counterparties with a minimum credit rating of "A", and setting specific limits for investments with those counterparties, which are reviewed monthly.

### 24 Fair value of financial instruments

The Credit Union has estimated fair values taking into account changes in interest rates and credit risk that have occurred since the assets and liabilities were acquired. These calculations represent management's best estimates based on a range of methods and assumptions; since they involve uncertainties, the fair values may not be realized in an actual sale or immediate settlement of the instruments. Interest rate changes are the main cause of changes in the fair value of the Credit Union's financial instruments. The carrying value is a reasonable approximation of fair value for the Credit Union's cash and cash equivalents, demand deposits, and certain other financial assets and liabilities.

The fair values of financial instruments are as follows:

- a) Interest bearing deposits with financial institutions

The fair value of interest bearing deposits with financial institutions is determined by discounting remaining contractual cash flows at current market interest rates offered for deposits with similar terms and risks.

- b) Derivative financial instruments

The fair value of derivative instruments is determined by using quoted market benchmark rates from an independent source. The Credit Union uses a valuation method that includes discounted cash flows on the remaining contractual life of a derivative instrument, and valuation models that use observable market data.

# Prospera Credit Union

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

c) Loans to members

In determining the fair value of loans to members, the Credit Union incorporates the following assumptions:

- i) Fair values are determined by discounting remaining contractual cash flows at current market interest rates offered for loans with similar terms, adjusting for estimated prepayments expected.
- ii) The total value of loans determined using the above assumption is reduced by the allowance for credit losses to determine the fair value of the Credit Union's loan portfolio.

d) Borrowings

The fair value of borrowings is determined by discounting remaining contractual cash flows at current market interest rates offered for borrowings with similar terms and risks.

e) Member deposits

In determining the fair value of member deposits, the Credit Union incorporates the following assumptions:

- i) For fixed rate, fixed maturity deposits, the Credit Union discounts the remaining contractual cash flows, adjusted for expected redemptions, at market interest rates offered for deposits with similar terms and risks.
- ii) For floating rate deposits, changes in interest rates have minimal impact on the fair value since deposits reprice to market frequently. On that basis, fair value is assumed to equal carrying value.

The following represents the approximate fair values of financial instruments of the Credit Union as at the statement of financial position date:

	2012			2011		
	Carrying value \$	Fair value \$	Difference \$	Carrying value \$	Fair value \$	Difference \$
Financial assets						
Interest bearing deposits with financial institutions	154,484	155,914	1,430	147,229	150,573	3,344
Derivative financial instruments	3,134	3,134	-	3,691	3,691	-
Loans to members	2,103,885	2,117,242	13,357	1,929,842	1,941,513	11,671
Financial liabilities						
Borrowings	170,770	171,168	(398)	69,924	69,924	-
Member deposits	2,029,773	2,036,204	(6,431)	1,962,140	1,967,920	(5,780)

## Notes to Consolidated Financial Statements

December 31, 2012

---

(expressed in thousands of dollars)

The following tables summarize the fair value of financial instruments which are accounted for at fair value on the Credit Union's consolidated statement of financial position. Fair value measurements are analyzed according to a fair value hierarchy of three levels, as outlined below. Observable inputs represent instances where market data is obtained from independent sources. Unobservable inputs are based on the Credit Union's own internal assumptions.

Level 1: Unadjusted market prices in active markets for identical assets and liabilities.

Level 2: Inputs, other than quoted prices included within Level 1, that are observable for the asset or liability either directly or indirectly. This level includes the majority of over the counter derivatives or certain monetary instruments.

Level 3: Entity level inputs which are not based upon market observable data.

	<b>2012</b>		
	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
	<b>\$</b>	<b>\$</b>	<b>\$</b>

	-	(18,233)	572

**Prospera Credit Union**  
Notes to Consolidated Financial Statements  
**December 31, 2012**

---

(expressed in thousands of dollars)

The Credit Union has financial instruments classified as Level 3 in the fair value hierarchy and has provided an analysis of movements in Level 3:

	2012 \$	2011 \$
At January 1	572	969
Changes in fair value during the year through the consolidated statement of income	-	260
Changes in fair value during the year through consolidated other comprehensive income	-	16
Cash flows received during the year	(420)	(673)
At December 31	152	572

The following table shows the sensitivity of the Level 3 measurements to reasonable possible alternative assumptions which includes a 10% change in the discount and repayment rates:

	Reflected in profit or loss	
	Favourable changes \$	Unfavourable changes \$
December 31, 2012	20	12
December 31, 2011	49	50

The above favourable and unfavourable changes are calculated independently from each other. Correlations and diversification effects are not taken into account.

## 25 Related party disclosure

Related parties of the Credit Union include subsidiaries, associates, post-employment benefit plans, directors and other key management personnel (“key management”), close family members of key management and entities which are controlled, jointly controlled or significantly influenced, or in which significant voting power is held, by key management or their close family members.

### a) Loans and deposits

The Credit Union provides banking services to key management and persons connected to them.

A number of transactions were entered into with key management in the normal course of business. All loans to directors, executive management and employees of the Credit Union are subject to the credit policies established for all members. Credit Union employees may receive special rates or other considerations with respect to loans at the Credit Union. Directors do not receive special rates or other considerations with respect to loans at the Credit Union.
