Consolidated Financial Statements **December 31, 2015** (expressed in thousands of dollars)

February 19, 2016

Independent Auditor's Report

To the Members of **Prospera Credit Union**

We have audited the accompanying consolidated financial statements of Prospera Credit Union and its subsidiaries, which comprise the consolidated statement of financial position as at December 31, 2015 and the consolidated statements of income and comprehensive income, changes in members' equity and cash flows for the year then ended, and the related notes, which comprise a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Prospera Credit Union and its subsidiaries as at December 31, 2015 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

1 General information

Prospera Credit Union (the "Credit Union") is incorporated under the Credit Union Incorporation Act of British Columbia and its operations are subject to the Financial Institutions Act of British Columbia (the "FIA"). The Credit Union's primary business activities include providing financial services to its members and the general public across British Columbia. It provides Personal Banking, Business Banking and Wealth Management services through a network of 16 branches, online and mobile banking, the Exchange ATM network and a contact centre.

The Credit Union is domiciled in Canada and its registered office is at #500 - 32071 S. Fraser Way, Abbotsford, British Columbia.

The consolidated financial statements have been approved for issue by the Board of Directors (the "Board") on February 17, 2016.

2 Basis of presentation

a) Statement of compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") using applicable IFRS as well as the regulations of the FIA. The accounting policies applied in these consolidated financial statements are based upon IFRS effective for the year ended December 31, 2015, as issued and effective.

b) Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis, except for available-for-sale financial assets, financial assets and financial liabilities accounted for at fair value through profit or loss and all derivative financial instruments, which are measured at fair value.

c) Functional and presentation currency

These consolidated financial statements are presented in Canadian dollars, which is also the Credit Union's functional currency. The figures shown in the consolidated financial statements are expressed in thousands of dollars, unless otherwise stated.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

d) Use of estimates and judgments

The preparation of the consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from those estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Information on significant areas of uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the consolidated financial statements are described in note 4.

3 Summary of significant accounting policies

a) Consolidation

The Credit Union consolidates investees when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

The Credit Union consolidates the following investees in which it has control as wholly owned subsidiaries. Its wholly owned subsidiaries are Prospera Insurance Agencies Ltd., Prospera Technologies Inc., 413297 B.C. Ltd., and Prospera Holdings Ltd.

Intercompany balances, and income and expenses arising from intercompany transactions, are eliminated in preparing the consolidated financial statements. Intercompany losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred.

b) Foreign currency translation

Transactions in foreign currencies are translated to the functional currency of the Credit Union at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between the amortized cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortized cost in the foreign currency translated at the exchange rate at the end of the reporting period. Foreign currency differences arising on translation are recognized in the consolidated statement of income. Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary items in a foreign currency that are measured at fair value are translated using the exchange rates at the date when the fair value was determined.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

c) Cash resources

Cash and cash equivalents include highly liquid balances with less than 90 days to maturity from the original date of issuance and include temporary clearing items. Interest bearing deposits with financial institutions include deposits with Central 1 Credit Union ("Central 1").

d) Financial assets and liabilities: categorization, measurement and recognition

i) Financial assets

Management determines the categorization of its financial assets at initial recognition. The Credit Union initially recognizes loans and receivables and deposits on the date that they are originated. All other financial assets, including assets designated at fair value through profit or loss ("FVTPL"), are recognized initially on the trade date at which the Credit Union becomes a party to the contractual provisions of the instrument. The Credit Union's financial assets are categorized as one of the following: financial assets at FVTPL, loans and receivables, financial assets available-for-sale ("AFS") and financial assets held-to-maturity ("HTM").

Financial assets at FVTPL

This category comprises financial assets classified as FVTPL and financial assets designated by the Credit Union as FVTPL upon initial recognition.

A financial asset is required to be classified as FVTPL if it is acquired principally for the purpose of selling it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivative financial instruments are also categorized as FVTPL unless they are designated and are effective as hedging instruments in a hedge accounting relationship. Gains and losses on assets classified as FVTPL are recorded in net income.

The Credit Union has not designated any assets as FVTPL. The Credit Union's financial assets classified as FVTPL consist of derivative financial instruments such as equity options and interest rate swaps related to securitized loans, index-linked deposit contracts, and economic hedging.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- 1) those that the Credit Union intends to sell immediately or in the short term, which are classified as FVTPL, and those that the Credit Union upon initial recognition designates as FVTPL;
- 2) those that the Credit Union upon initial recognition designates as AFS; or

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

3) those for which the holder may not recover substantially all of its initial investment, for reasons other than credit deterioration.

Loans and receivables are recorded at fair value on initial recognition and subsequently at amortized cost using the effective interest method.

The Credit Union's loans and receivables principally consist of cash and cash equivalents, loans to members, interest bearing deposits with financial institutions, and other receivables.

Financial assets available-for-sale

AFS assets are those non-derivative financial assets that are designated as AFS or are not classified as FVTPL, not designated as FVTPL or do not qualify as loans and receivables. AFS assets are recorded at cost. Subsequently, they are carried at fair value, unless they do not have a quoted market price in an active market and fair value is not reliably determinable, in which case they are carried at cost.

Unrealized gains and losses arising from changes in the fair value of AFS financial assets are recognized directly in equity, until the financial asset is derecognized or impaired. As a result of the derecognition or impairment of an AFS asset, the cumulative gain or loss previously recognized in equity is recognized in the consolidated statement of income.

Interest income on AFS assets is calculated using the effective interest method and is recognized in the consolidated statement of income. Dividends on AFS equity instruments are recognized in the consolidated statement of income when the Credit Union's right to receive payment is established.

The Credit Union's AFS assets consist of investments.

Financial assets held-to-maturity

HTM assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Credit Union's management has the positive intention and ability to hold to maturity, other than:

- 1) those that the Credit Union upon initial recognition designates as FVTPL;
- 2) those that the Credit Union designates as AFS; and
- 3) those that meet the definition of loans and receivables.

These are initially recognized at fair value including direct and incremental transaction costs and measured subsequently at amortized cost, using the effective interest method. Interest on HTM assets is recognized in the consolidated statement of income.

The Credit Union's HTM assets consist of government backed securities.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

ii) Financial liabilities

Management determines the categorization of its financial liabilities at initial recognition. The Credit Union initially recognizes financial liabilities (including liabilities designated at FVTPL) on the trade date at which the Credit Union becomes a party to the contractual provisions of the instrument. Financial liabilities are categorized as FVTPL or financial liabilities at amortized cost. Financial liabilities are derecognized when extinguished.

Financial liabilities at FVTPL

Upon initial recognition, financial liabilities at FVTPL are classified or are designated by the Credit Union as FVTPL.

A financial liability is required to be classified as FVTPL if it is incurred principally for the purpose of repurchasing it in the near term or if it is part of a portfolio of identified financial liabilities that are managed together and for which there is evidence of a recent actual pattern of short-term profittaking. Derivative liabilities are also categorized as FVTPL unless they are designated and are effective hedging instruments in a hedge accounting relationship. Gains and losses on FVTPL financial liabilities are recorded in net income.

At December 31, 2015, the Credit Union's financial liabilities classified as FVTPL consist of derivative financial instruments, and certain secured borrowings have also been designated as FVTPL in order to reduce a reporting mismatch that would arise if such borrowings were recorded at amortized cost.

Financial liabilities at amortized cost

Financial liabilities that are not classified or designated as FVTPL fall into this category. Financial liabilities at amortized cost consist of amounts drawn on lines of credit, accounts payable, member deposits, certain secured borrowings, and member deposit shares. These are measured at fair value on initial recognition and subsequently at amortized cost using the effective interest method.

iii) Fair value of financial instruments

The best evidence of fair value at initial recognition is prices quoted in an active market. Fair values of financial instruments quoted in active markets are determined by reference to closing bid prices at the reporting date. If there is no active market for a financial instrument, the Credit Union establishes fair value using an appropriate valuation technique. These techniques principally include the use of recent arm's length transactions for investments in unquoted securities, discounted cash flow analysis for derivatives, third-party option pricing models for index-linked option contracts and other valuation techniques commonly used by market participants.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

Fair values reflect the credit risk of the instruments and include adjustments to take account of the credit risk of the Credit Union and the counterparty as relevant. Fair value estimates obtained from models are adjusted for other factors, such as liquidity risk or model uncertainties, to the extent that the Credit Union believes a third-party market participant would take them into account in pricing a transaction. Fair values determined by applying valuation techniques utilize independent observable market inputs to the maximum extent possible.

iv) Impairment of financial assets

The Credit Union assesses, at each statement of financial position date, whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are recorded only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and the loss event has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Objective evidence that financial assets are impaired can include significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of a loan or advance by the Credit Union on non-market terms that the Credit Union would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or other observable data relating to a group of assets such as conditions that correlate with defaults in the group.

Financial assets classified as loans and receivables

The Credit Union maintains an allowance for credit losses that, in management's estimation, is considered adequate to provide for credit-related losses. The allowance for credit losses consists of individual and collective allowances. The individual allowance is determined on the basis of specific loans that, in management's opinion, may not be fully collectible. The individual allowance is the amount required to reduce the carrying value of an impaired loan to its present value of estimated future cash flows discounted at the financial asset's original effective interest rate. If a loan has a variable interest rate, the discount rate for measuring any impairment is the current effective interest rate determined under the contract at the time the loan becomes impaired.

For the purposes of a collective evaluation of impairment, the portfolio is grouped on the basis of similar credit risk characteristics. These characteristics are relevant to the estimation of future cash flows and historical loss experience which is adjusted on the basis of current observable data to reflect the effects of current conditions. Assets that are individually assessed for impairment and for which no individual allowances are recorded are included in a collective assessment of impairment.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

The Credit Union adjusts its input to its collective allowance methodology on an ongoing basis, taking into account factors such as historical loss experience and adjusting for current observable data that did not impact the period which the historical loss experience was based on. Estimates of changes in future cash flows for groups of assets reflect and are directionally consistent with changes in related observable data from period to period (for example, bankruptcy, residential mortgage delinquency, or other factors indicative of changes in the probability of losses by the Credit Union and in their magnitude).

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognized in the consolidated statement of income in loan impairment expense.

Loans that were past due and either subject to collective impairment assessment or are individually significant and whose terms have been renegotiated are no longer considered to be past due but are treated as new loans. In subsequent years, if the loan becomes past due again, this will be disclosed only if the loan is renegotiated.

The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Credit Union to reduce any differences between loss estimates and actual loss experience. When a loan is uncollectible, it is written off after the amount of the final loss has been determined.

Assets classified as available-for-sale

A significant or prolonged decline in the fair value of an AFS equity security below its cost is considered objective evidence in determining whether the asset is impaired. An AFS debt instrument may be identified as impaired due to circumstances which can include actual delinquency in contractual payment of principal or interest and/or significant events which indicate there is doubt as to the collectibility of the principal or contractual interest. For designated AFS assets, if any such evidence exists, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the consolidated statement of income, is reclassified from equity and recognized in the consolidated statement of income.

If, in a subsequent period, the fair value of a debt instrument classified as AFS increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the consolidated statement of income, the impairment loss is reversed through the consolidated statement of income. Impairment losses recognized in the consolidated statement of income on equity instruments are not reversed.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

Assets classified as held-to-maturity

A HTM debt instrument may be identified as impaired due to circumstances which can include actual delinquency in contractual payment of principal or interest and/or significant events which indicate there is doubt as to the collectibility of the principal or contractual interest. In the case of an impairment, the impairment loss is reported as a deduction from the carrying value of the investment and recognized in the consolidated statement of income.

e) Property held for resale

In certain circumstances, the Credit Union may take possession of property held as collateral as a result of foreclosure on loans that are in default. Foreclosed properties are classified as assets held for sale and are measured at the lower of the carrying amount and the fair value less costs to sell.

The Credit Union does not, as a rule, occupy repossessed properties for its business use. These assets are normally sold in a manner that maximizes the benefit to the Credit Union, the member and the member's other creditors, and may involve the use of realtors.

The Credit Union does not hold any properties that were acquired as a result of loan default or that are held for resale.

f) Derivatives and hedge accounting

Derivative financial instruments are financial contracts whose value changes in response to a change in a specified interest rate, exchange rate or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract. Derivative contracts have no initial net investment or a net investment which would be smaller than a non-derivative contract and are settled at a future date.

Derivatives are initially recognized at fair value on the date a derivative contract is entered into. They are subsequently re-measured at their fair value and reported as assets where they have a positive fair value or as liabilities where they have a negative fair value.

Derivatives may also be embedded in other financial instruments and are treated as separate derivatives when:

- i) their economic characteristics and risks are not closely related to those of the host contract;
- ii) a separate instrument with the same terms would meet the definition of a derivative instrument; and
- iii) the host contract is not designated as FVTPL or classified as FVTPL.

Changes in fair value on derivative financial instruments not qualifying for hedge accounting are recognized in the consolidated statement of income.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

The Credit Union designates derivatives as either hedges of highly probable future cash flows attributable to a recognized asset or liability, or a forecasted transaction (cash flow hedge), or FVTPL derivatives in instances where the derivative does not qualify or has not been designated as a hedge in a hedge accounting relationship. The Credit Union periodically uses derivatives for economic hedging purposes to mitigate an identified financial risk.

g) Cash flow hedges

The Credit Union uses hedge accounting for derivatives designated as cash flow hedges provided certain criteria are met. The Credit Union documents the relationship, at its inception, between hedged items and hedging instruments, as well as identifying the risk being hedged and its risk management objective and strategy for undertaking various hedge transactions. The Credit Union also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in the cash flows attributable to the hedged risk.

The effective portion of changes in the fair value of a derivative that is designated and qualifies as a cash flow hedge is recognized in the consolidated statement of changes in members' equity. The gain or loss relating to the ineffective portion is recognized immediately in the consolidated statement of income. Amounts accumulated in equity are reclassified to the consolidated statement of income in the periods when the hedged item affects profit or loss. When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, hedge accounting ceases and any cumulative gain or loss existing in equity at that time remains in equity and is recognized when the hedged forecast transaction is ultimately recognized in the consolidated statement of income. However, when a forecast transaction is no longer expected to occur, or when the hedged item expires or is sold, the cumulative gain or loss that was deferred in equity is immediately transferred to the consolidated statement of income.

h) Derecognition of financial instruments

Financial assets are derecognized when the contractual rights to receive the cash flows from these assets have ceased to exist or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred. If the Credit Union has neither transferred nor retained substantially all the risks and rewards of the transferred financial asset, it assesses whether it has retained control over the transferred asset. If control has been retained, the Credit Union continues to recognize the transferred asset to the extent of its continuing involvement. If control has not been retained, the Credit Union derecognizes the transferred asset.

Financial liabilities are derecognized when they have been redeemed or otherwise extinguished.

The Credit Union, through securitizations, periodically transfers loans to independent third parties. Where the Credit Union's securitizations and other transfers of receivables do not result in a transfer of contractual cash flows of the receivables or an assumption of an obligation to pay the cash flows of the receivable to a transferee, the Credit Union does not derecognize the transferred receivables and instead records a secured borrowing with respect to any consideration received.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

For whole loan sales that result in a transfer of contractual cash flow, the Credit Union derecognizes the assets sold. The Credit Union accounts for gains or losses in the consolidated statement of income. The amount of the gain or loss is based on the carrying value of the loans sold.

i) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognized amounts with the same counterparty and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

j) Interest income and expenses

Interest income or expense for all interest bearing financial instruments is recognized within interest income or interest expense in the consolidated statement of income using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Credit Union estimates future cash flows considering all contractual terms of the financial instrument but does not consider future credit losses.

The calculation of the effective interest method includes all fees and costs paid or received between parties to the contract that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability. Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Interest income and expenses presented in the consolidated statement of income include:

- i) interest on financial assets and financial liabilities measured at amortized cost, calculated on an effective interest basis;
- ii) interest on AFS investment securities calculated on an effective interest basis;
- iii) the effective portion of fair value changes in qualifying hedging derivatives designated in cash flow hedges of variability in interest cash flows, in the same period that the hedged cash flows affect interest income/expense;
- iv) fair value changes in qualifying derivatives, including hedge ineffectiveness; and
- v) gains or losses on economic hedges.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

k) Fee and commission income

The accounting treatment for loan fees varies depending on the transaction. Fees that are considered to be adjustments to loan yield are recognized using the effective interest method. The effective interest method capitalizes fees and transaction costs on the consolidated statement of financial position and amortizes them to interest income over the expected life of the related loan. Mortgage prepayment fees are recognized in interest income when received, unless they relate to a minor modification to the terms of the mortgage, in which case the fees are recognized over the expected remaining term of the original mortgage using the effective interest method. Loan origination, restructuring and renegotiation fees for Business Banking loans are recorded as interest income over the expected term of the loan using the effective interest method. Commitment fees are recorded in interest income over the expected term of the loan, unless the loan commitment is not expected to be used, in which case they are recorded to other income. Loan discharge and administration fees are recorded directly to other income when the loan transaction is complete.

Loan fees that are recognized using the effective interest method are included with loan balances on the consolidated statement of financial position.

Service charges and foreign exchange transaction fees are recognized on an accrual basis when the service is performed.

Commission income is earned on the sale of insurance policies and is recognized as at the related insurance policy's effective date. The Credit Union may receive additional commissions from insurance companies, which are recorded at the earlier of the period in which amounts can be reliably measured or the period in which the amounts are received.

Investment management fees, mutual fund fees and financial planning fees are recorded at the date of sale on an accrual basis or upon performance of services.

l) Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

m) Property, premises and equipment

i) Recognition and measurement

All premises and equipment used by the Credit Union are measured at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

ii) Subsequent costs

Subsequent expenditures are included in the asset's carrying amount or are recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Credit Union and the cost of the item can be reliably measured.

All repair and maintenance costs are charged to the consolidated statement of income during the financial period in which they are incurred.

iii) Depreciation

Land is carried at cost and is not depreciated. Asset classes are further categorized for depreciation where significant differences in the estimated useful life of the various components of individually significant assets are identified. Depreciation is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

Buildings and betterments	7 to 30 years
Leasehold improvements	3 to 10 years
Computer equipment	3 to 10 years
Office furniture	3 to 7 years
Equipment	3 to 7 years

The residual values and useful lives of premises and equipment are reviewed, and adjusted if appropriate, at each statement of financial position date. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount and are included in the consolidated statement of income.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

n) Intangibles

Computer software is capitalized when the future economic benefit is expected to exceed a period of one year. Otherwise, software costs are expensed when incurred. Capitalized software costs are initially recognized at cost and amortized using the straight-line method over the expected useful life. The expected useful life ranges from 3 to 10 years.

o) Leased assets

In accordance with International Accounting Standards ("IAS") 17, *Leases*, the economic ownership of a leased asset is transferred to the lessee if the lessee bears substantially all the risks and rewards related to the ownership of the leased asset. In some cases, the lease transaction is not always conclusive, and management uses judgment in determining whether the lease is a finance lease arrangement that transfers substantially all the risks and rewards incidental to ownership. If this determination is positive, the related asset is then recognized by the lessee at the inception of the lease at an amount equal to the lower of its fair value and the present value of the minimum lease payments. A corresponding amount is recognized as a finance lease liability.

All of the Credit Union's lease agreements are classified as operating leases. Payments on operating lease agreements are recognized as an expense on a straight-line basis over the lease term. Associated costs such as maintenance and insurance are expensed as incurred.

p) Income tax

Income tax expense comprises current and deferred taxes. Current and deferred taxes are recognized in the consolidated statement of income except to the extent that they relate to items recognized directly in members' equity or in other comprehensive income.

i) Current income tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

ii) Deferred income tax

Deferred tax is recognized with respect to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities against current tax assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable income will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

q) Employee benefits

The Credit Union operates various pension plans. The plans are generally funded through contributions to trustee-administered funds determined by periodic actuarial calculations. The Credit Union has both defined benefit and defined contribution plans.

i) Defined benefit pension plans

A defined benefit pension plan typically defines an amount of a pension benefit that an employee will receive on retirement, usually dependent upon one or more factors, such as age, years of service and compensation. The actuarial and investment risks of a defined benefit plan are typically primarily the responsibility of the sponsor of the plan.

The Credit Union uses the projected unit credit method to determine the present value of its defined benefit pension obligations and the related current service cost and, where applicable, past service cost. The defined benefit obligation is calculated on an annual basis by the appointed independent actuary to the respective defined benefit plans. This requires the Credit Union to determine the benefit attributable to the current and prior periods and to make estimates about demographic and financial variables that will affect the ultimate cost of the benefit. The present value of the defined benefit obligation of the respective plan is determined by discounting the estimated future cash flow outflows using interest rates of high quality corporate bonds that are denominated in Canadian dollars and that have terms to maturity approximating the terms of the respective related defined benefit plan liability.

For funded plans, the Credit Union recognizes the fair value of the plan assets in accordance with the requirements of IFRS 13 for fair value measurements. Financial instruments such as quoted equities are valued using closing prices.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

The fair value of any plan assets is deducted from the present value of the defined benefit obligation in determining the deficit or surplus on an individual plan basis. If a plan surplus exists, the fair value of the plan assets recognized on the Credit Union's consolidated statement of financial position is limited to the amount from which the Credit Union can derive a future economic benefit.

The Credit Union recognizes the service cost of the respective plans in the consolidated statement of income. The service cost principally comprises the current service cost representing the increase in the present value of the defined benefit obligation from employee service in the current period and the past service cost representing the changes in the present value of the defined benefit obligation from a plan amendment or curtailment.

The Credit Union recognizes the net interest on the defined benefit liability (asset) directly in the consolidated statement of income.

Re-measurements of the defined benefit asset (obligation) are recognized immediately in other comprehensive income and are transferred into other reserves within the consolidated statement of changes in members' equity. Re-measurements principally consist of actuarial gains and losses, the return on plan assets excluding amounts incorporated into the net interest on the net defined benefit asset (obligation) and any change in the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit asset (obligation).

ii) Post-employment health care benefits

The Credit Union operates a post-employment health care benefit plan. The method of accounting, assumptions and the frequency of valuations are similar to those used for defined benefit pension plans.

iii) Defined contribution pension plans

For defined contribution plans, the Credit Union pays a specified flat rate for employer contributions. The Credit Union has no further payment obligations once the contributions have been paid. The contributions are recognized as an employee benefit expense on an accrual basis in the periods during which services are rendered by employees.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

iv) Participation in multi-employer pension plan

The Credit Union provides defined retirement benefits to certain employees through a multi-employer plan administered by Central 1. Each member credit union is exposed to the actuarial risks of the other employers with the result that, in the Credit Union's opinion, there is no reasonable way to allocate any defined benefit obligations. The plan has informed the Credit Union that it is not able to provide defined benefit information on a discrete employer basis as the investment records are not tracked by individual employer and each employer is exposed to the actuarial risks of the plan as a whole. Accordingly, the Credit Union's participation in the plan is accounted for as a defined contribution plan with contributions recorded on an accrual basis. The Credit Union has provided additional disclosure on the overall funding status of the multi-employer plan and future contribution levels in note 14(h).

r) Related parties

A related party is a person or an entity that is related to the Credit Union.

- i) A person or a close member of that person's family is related to the Credit Union if that person:
 - has control or joint control over the Credit Union, with the power to govern the Credit Union's financial and operating policies;
 - 2) has significant influence over the Credit Union, participating in financial or operating policy decisions, but not control over these policies; or
 - is a member of the key management personnel of the Credit Union. Key management personnel, consistent with the definition under IAS 24, *Related Party Disclosures*, are persons having authority and responsibility for planning, directing and controlling the activities of the Credit Union, directly or indirectly. Key management personnel for the Credit Union are comprised of the Board and executive management.

An entity is related to the Credit Union if any of the following conditions apply:

- 1) the entity and the Credit Union are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others);
- 2) one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);
- 3) both entities are joint ventures of the same third party;
- 4) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

- 5) the entity is a post-employment benefit plan for the benefit of employees of either the Credit Union or an entity related to the Credit Union;
- 6) the entity is controlled or jointly controlled by a person identified in (i) above; or
- 7) a person identified in (i)(1) above has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

s) Provisions

A provision is recognized if, as a result of a past event, the Credit Union has a present legal or constructive obligation that can be estimated reliably and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Credit Union from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Credit Union recognizes any impairment loss on the assets associated with the contract.

t) Equity and non-equity shares

Upon opening an account at the Credit Union, new members are required to purchase a minimum of 25 Class A Membership equity shares (junior members - five shares). Class A Membership equity shares are redeemable on demand by the member. Periodically, members may purchase Class F, G, H or I Preferred shares, as authorized by the Board, which are redeemable at the end of the time periods stated for that particular class of share. Accordingly, these classes of shares are recorded as member deposits.

Class A Membership, Class C Investment, Class D Insured, Class E Equity, and Preferred shares of the Credit Union are not subject to guarantee by the Credit Union Deposit Insurance Corporation of British Columbia ("CUDIC"). No Class H or I Preferred shares are issued. Dividends may be declared annually on Class A Membership, Class C Investment, Class E Equity and Preferred shares at the discretion of the Board.

Members, periodically, as authorized by the Board, are permitted to purchase Class C Investment and Class E Equity shares. Redemption of Class C Investment and Class E Equity shares is subject to certain conditions and approval of the Board. Accordingly, they are recorded as members' equity.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

u) Current year changes in accounting policies

There were no current year changes in accounting policies that had a significant effect on the Credit Union's consolidated financial statements.

v) Standards and interpretations issued but not yet effective

A number of standards and interpretations, and amendments thereto, have been issued by the IASB that are not effective for these consolidated financial statements. The Credit Union has not adopted any standards that are not yet effective but are eligible for early adoption. Those expected to have an effect on the Credit Union's consolidated financial statements are discussed below:

i) IFRS 9 - Financial Instruments

IFRS 9 was issued in 2009 and addresses classification and measurement of financial assets and financial liabilities. The final version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains three primary measurement categories for financial assets: amortized cost, fair value through other comprehensive income and fair value through profit or loss. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option to recognize changes in fair value with no recycling of gains or loss to the income statement. IFRS 9 requires credit losses to be recognized on a single, forward looking expected loss impairment model rather than using an incurred loss model. For financial liabilities, there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. IFRS 9 relaxes the requirements for hedge effectiveness by replacing the current effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the 'hedged ratio' to be the same as the one management actually uses for risk management purposes. Contemporaneous documentation is still required but is different to that currently prepared under IAS 39. The standard is effective for accounting periods beginning on or after January 1, 2018. Early adoption is permitted. The Credit Union continues to assess the full impact of IFRS 9.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

ii) IFRS 15 - Revenue from Contracts with Customers

In September 2015, the IASB issued an amendment to IRFS 15, *Revenue from Contracts with Customers*, to defer the effective date by one year to 2018. IFRS 15 deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognized when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces IAS 18, *Revenue*, and IAS 11, *Construction Contracts*, and related interpretations. The standard is effective for annual periods beginning on or after January 1, 2018 and earlier application is permitted. The Credit Union continues to assess the full impact of IFRS 15.

iii) IFRS 16 - Leases

IFRS 16 was issued in January 2016 and replaces current guidance in IAS 17. Under IAS 17, lessees are required to make a distinction between a finance lease (on balance sheet) and an operating lease (off balance sheet). IFRS 16 requires lessees to recognize a lease liability reflecting future lease payments and a 'right-of-use asset' for virtually all contracts. For lessors the accounting stays almost the same as IAS 17. The standard is effective for accounting periods beginning on or after January 1, 2019. The Credit Union is in the process of assessing the impact of IFRS 16.

iv) Annual Improvements 2012-2014

The IASB issued Annual Improvements to IFRS 2012-2014 cycle on September 25, 2014. The amendments affect IFRS 5, IFRS 7, IAS 19 and IAS 34 and apply for annual periods beginning on or after January 1, 2016. The Credit Union has determined that the amendments to IFRS 5, IAS 19, and IAS 34 are not applicable, however, amendments to IFRS 7 are applicable as follows:

1) IFRS 7 - Financial instruments: Disclosure

Servicing contracts: If an entity transfers a financial asset to a third party under conditions which allow the transferor to derecognise the asset, IFRS 7 requires disclosure of all types of continuing involvement that the entity might still have in the transferred assets. IFRS 7 provides guidance on what is meant by continuing involvement and guidance to help management determine whether the terms of an arrangement to service a financial asset which has been transferred constitute continuing involvement. The amendment is prospective with an option to apply retrospectively. A consequential amendment to IFRS 1 is included to give the same relief to first-time adopters.

The Credit Union has yet to assess the full impact of the amendments to IFRS 7.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

4 Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Credit Union's accounting policies. Change in assumptions may have a significant impact on the consolidated financial statements in the period the assumptions changed. The principal areas involving a higher degree of judgment or complexity and/or areas which require significant estimates are described below:

a) Allowance for credit losses on loans to members

The Credit Union regularly reviews its loan portfolio for impairment. In determining whether an impairment loss should be recorded in the consolidated statement of income, the Credit Union makes judgments as to whether there is any observable data indicating an impairment trigger followed by a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of members in a group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed annually to reduce any difference between loss estimates and actual loss experience. Were the net present value of estimated cash flows to differ by +/-1%, the impairment loss is estimated to be \$86 (2014 - \$114) higher or lower. The Credit Union has disclosed the allowance for credit losses on loans to members in note 5.

b) Fair values of financial instruments

The fair values of financial instruments where no active market exists or where quoted prices are not otherwise available are determined using specific valuation techniques. In these cases, the fair values are estimated from observable data in respect of similar financial instruments or by using models. Where market observable inputs are not available, they are estimated based on appropriate assumptions. Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by management. To the extent practical, models use only market observable data; however, areas such as credit risk (both the Credit Union's credit risk and counterparty risk) and correlations require management to make estimates. The Credit Union has disclosed the fair values of financials instruments in note 25.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

c) Securitizations and derecognition of transferred financial instruments

The Credit Union transfers residential mortgages to an independent third party either directly or through an initial transfer to intermediary financial institutions that are eligible, authorized transferors approved by the third party.

Depending on the contractual arrangements, the Credit Union may not derecognize the securitized residential mortgages and may instead recognize a secured borrowing; may recognize only a portion of the assets up to the Credit Union's remaining involvement in those assets; or may derecognize the assets and recognize, as separate assets or liabilities, any rights and obligations constituted or retained in the transfer. In assessing the derecognition criteria, management is often required to make judgments as to the extent to which cash flows are transferred and any continuing exposure to risks and rewards of the transferred receivables. The Credit Union has disclosed the accounting treatment for securitization transactions during the year in note 6.

d) Retirement benefits

The present value of retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of pension obligations.

One of the assumptions used in determining the net cost for retirement benefit plans is the discount rate. The Credit Union determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Credit Union considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension liability. Other key assumptions for pension obligations are based in part on current market conditions. The Credit Union has disclosed the accounting treatment of retirement benefits during the year in note 14.

e) Income taxes

The Credit Union computes an effective tax rate which includes an evaluation of the current and future availability of the credit union deduction under the Canadian Income Tax Act and the small business income tax rate under the British Columbia Income Tax Act. The credit union deduction and the BC small business income tax rate apply to credit unions on taxable income of the credit union until such time as 4/3 of 5% of the amounts owing to members (including deposits, members shares and other borrowings) (the "maximum cumulative reserve") exceeds the cumulative taxable income that was previously subject to the credit union deduction (the "preferred rate amount") of the credit union. An estimate of future deposit, member borrowing, share and income growth is based on the modeling of the Credit Union's business plan, inclusive of economic indicators, and provides the basis in determining the availability of the credit union deduction and the credit union small business income tax rate.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

In 2013, the Canadian Income Tax Act was amended to phase out the credit union deduction available to credit unions over five years. The preferential treatment will be reduced to 80% for 2016, 60% for 2017, 40% for 2018, 20% for 2019 and 0% for 2020 and later years.

The credit union deduction and the BC small business income tax rate are taken into account to determine the effective tax rate used in computing the income tax provision. However, the actual amounts of income tax expense do not become known until the filing with and assessment of the income tax return by the relevant tax authorities, which occurs subsequent to the issuance of the consolidated financial statements. To the extent that estimates differ from the final tax returns, net income would be affected in the subsequent year.

The Credit Union periodically assesses its liabilities and contingencies related to income taxes for all years open to audit based on the latest information available. For matters where it is probable that an adjustment will be made, the Credit Union records its best estimate of the tax liability including the related interest and penalties in the current tax provision. The Credit Union has disclosed the accounting treatment for income tax for the year in note 20.

5 Loans to members

	2015 \$	2014 \$

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

Reconciliation of allowance for credit losses

			2015	2014
	Personal Banking mortgages and loans \$	Business Banking mortgages and loans \$	Total \$	Total \$
Balance - Beginning of year	1,495	3,764	5,259	6,081
Loan write-offs	(857)	(856)	(1,713)	(2,622)
(Decrease) increase in impairment allowance	952	548	1,500	1,800
Balance - End of year	1,590	3,456	5,046	5,259
Individual allowance Collective allowance	285 1,305	1,008 2,448	1,293 3,753	1,792 3,467
Total allowance for credit losses	1,590	3,456	5,046	5,259

Loans to members individually impaired

A loan is considered impaired when a counterparty has not made a payment by the contractual due date and an individual allowance for credit has been established. The following table presents the carrying value of loans that are individually impaired:

	2015 \$	2014 \$
Personal Banking Residential mortgages Loans	1,968 143	1,649 1,074
Business Banking mortgages and loans	2,007	1,709
	4,118	4,432

Loans past due but not impaired

A loan is considered past due when a counterparty has not made a payment by the contractual due date. The following table presents the carrying value of loans that are past due but not classified as impaired because they are either:

- (i) less than 90 days past due and there is no information that an impairment event has occurred; or
- (ii) fully secured and collection efforts are reasonably expected to result in repayment.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

Loans that are past due but not impaired are as follows:

				2015	2014
	1-29 days \$	30-89 days \$	90 days and greater \$	Total \$	Total \$
Personal Banking Residential mortgages Loans	10,373 224	625 291	890 -	11,888 515	16,371 1,187
Business Banking mortgages and loans	1,913	1,182	-	3,095	3,530
	12,510	2,098	890	15,498	21,088

The fair value of the collateral held by the Credit Union as security for impaired and past due loans was \$32,436 (2014 - \$40,684). The Credit Union has estimated the fair value of collateral based on an updated assessment of the security appraisals undertaken at the original funding assessment or management's knowledge of the fair value of security.

The principal collateral and other credit enhancements the Credit Union holds as security for loans include:

- (i) insurance and mortgages over residential lots and properties;
- (ii) recourse to business assets such as real estate, equipment, inventory and accounts receivable;
- (iii) recourse to the Business Banking real estate properties being financed; and
- (iv) recourse to liquid assets, guarantees and securities.

Valuations of collateral are updated periodically depending on the nature of the collateral. The Credit Union has policies in place to monitor the existence of undesirable concentration in the collateral supporting its credit exposure.

During the year, the Credit Union recorded recoveries of \$192 (2014 - \$203) on loans that have been previously written off.

6 Loan securitizations and other transfers

Transferred financial assets that are not derecognized in their entirety

The Credit Union securitizes insured residential mortgages by participating in the National Housing Authority ("NHA") CMB and MBS programs. Through the programs, the Credit Union issues securities backed by residential mortgages that are insured against borrower's default. Once the mortgages are securitized, the Credit Union assigns underlying mortgages and/or related securities to Canada Mortgage and Housing Corporation ("CMHC").

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

During the year, the Credit Union entered into transfer agreements which were reviewed in order to determine whether the transfers of financial assets should result in all or a portion of the transferred mortgages being derecognized from its consolidated statement of financial position. The derecognition requirements include an assessment of whether the Credit Union's rights to contractual cash flows have expired or have been transferred or whether an obligation has been undertaken by the Credit Union to pay the cash flows collected on the underlying transferred assets over to a third party. The derecognition standards also include an assessment of whether substantially all the risks and rewards of ownership have been transferred.

The Credit Union has determined that an amount of \$74,011 (2014 - \$73,199) raised from securitization transactions during the year should be accounted for as a secured borrowing as the Credit Union did not transfer substantially all of the risks and rewards of ownership, principally because it did not transfer prepayment, interest and credit risk of the mortgages in the securitization. At December 31, 2015, the Credit Union had \$194,149 (2014 - \$157,750) of residential mortgages which had been securitized and included on the consolidated statement of financial position as the securitization transactions did not meet the requirements for derecognition. The total carrying amount of the original loans securitized as at December 31, 2015 was \$261,105 (2014 - \$187,094) at the point of initial securitization. These loans are held as security for the secured borrowing (note 11). As a result of the transactions, the Credit Union receives the net differential between the monthly interest receipts of the mortgages and the interest expense on the borrowings. The exposure to variability of future interest income and expense has been incorporated into the Credit Union's interest rate sensitivity calculations in note 22.

The following table shows the carrying amounts of assets and liabilities relating to securitization transactions which have not been derecognized in their entirety:

	Loans an	d receivables
	2015 \$	2014 \$
Carrying amount of assets Carrying amount of associated liabilities Carrying amount of derivatives	240,230 (248,113) 3,653	179,682 (183,395) 1,556
For those liabilities that have recourse only to the transferred assets: Fair value of assets Fair value of associated liabilities	247,017 (248,113)	182,762 (183,395)
Fair value of associated derivatives	3,653	1,556
Net position	(1,673)	(1,234)

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

Transferred financial assets that are derecognized

During 2015, the Credit Union entered into a whole loan sale agreement with Central 1 to sell a pool of \$19,772 CMHC insured mortgages. The Credit Union received net proceeds of \$20,030 and recognized a net gain of \$258 (note 17) in the consolidated statement of income. The Credit Union transferred all rights and obligations to the interest and principal from these mortgages and retains no prepayment, credit and interest rate risk. The Credit Union continues to service these mortgages and remit any associated net cash flow to Central 1. There were no whole loan sales during 2014. The following table describes the mortgages to be collected by the Credit Union on behalf of Central 1:

2015

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

Included in Central 1 equity shares and accrued dividends are 88,587 Class E Central 1 shares issued with a par value of \$0.01 each, redeemable at \$100 each at the option of Central 1. There is no separately quoted market value for these shares and the timing of redemption cannot be determined.

In January 2016, Central 1 announced a proposed capital restructuring plan which would include 25% of the Class E shares being redeemed at \$100/share. The proposal would also require that a significant portion of the proceeds from the redemption of the Class E shares be reinvested into other Central 1 shares. The Central 1 proposed capital restructuring plan still requires regulatory approval by FICOM and a member vote at the April 2016 annual general meeting of Central 1.

Management has determined that, as this information was not known at December 31, 2015, and taking into account other existing considerations as to the ability to reliably determine the fair value of the Class E shares, the range of reasonable fair value estimates at the balance sheet date is significant and the probabilities of the various estimates cannot be reasonably assessed. As a result, the Class E shares continue to be carried at cost.

		293,109	227,037
Current Non-current		70,086 223,023	43,642 183,395

As of December 31, 2015, the Credit Union has two approved lines of credit totalling \$156,724 (2014 - \$156,724).

Security provided as collateral for the line of credit facilities comprises a general assignment of loans to members, accounts receivable, and a demand debenture in favour of Central 1.

The secured borrowings arise from securitization transactions and are secured by specific pools of loans to members of \$194,149 (2014 - \$157,750) and government backed securities of \$46,081 (2014 - \$21,932) (notes 6 and 7).

	3,826	4,179

The changes in Class C Investment equity shares and Class E Equity shares relate to redemptions only as no shares were issued during the year (2014 - nil).

14 Pension and other retirement benefits

The Credit Union provides pension benefits to employees through defined contribution, defined benefit, and supplemental retirement and multi-employer defined benefit plans. Other post-retirement benefits including health care, dental benefits or cash alternatives are provided to eligible Credit Union employees upon or after retirement.

The defined benefit plans are registered in the province of British Columbia and governed by provincial regulations and practices. They are administered by a Board of Trustees.

The Credit Union operates four defined benefit plans in Canada. Three of these plans are not material in relation to the total of the defined benefit plans. The risk characteristics and assumptions are similar for all defined benefit plans; therefore, the information provided below relates to the four plans combined. The Credit Union funds the defined benefit plans and multi-employer defined benefit plans based on actuarially prescribed amounts. The unfunded supplemental retirement and non-pension benefits are paid by the Credit Union at the time of entitlement. The weighted average duration of the defined benefit obligation is 17 years (2014 - 18 years).

Retirement benefits for the defined contribution plans are paid by the Credit Union monthly. The unfunded portion of the defined benefit obligation is \$3,578 (2014 - \$3,939). The accrued benefit obligation for the supplemental retirement plan is secured by an irrevocable letter of credit issued by the Credit Union in the amount of \$2,730 (2014 - \$2,597).

The accrued benefit obligation and plan assets were actuarially measured for accounting purposes as of December 31, 2015. The effective date of the last actuarial valuation report for funding purposes was December 31, 2012 and the effective date of the next required actuarial valuation report for funding purposes will be December 31, 2015.

Fair value of plan assets at December 31	20,600	18,912

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

ii) Funded plan assets comprise the following:

	Funded defined benefit plans	
	2015 %	2014 %
Asset category		
Equity securities	48	59
Debt instruments	29	30
Real estate	12	7
Other assets	11	4
	100	100

Every three years, an actuarial valuation is performed to assess the financial position of the funded plans and the adequacy of the funding level. The most recent actuarial valuations, which were conducted as at December 31, 2012, indicated a going concern unfunded liability of \$1,616 and a solvency deficiency of \$5,692. The deficit is targeted to be financed over time through increased contributions. The pension regulator has determined the period during which the solvency deficit must be funded. As approved by the regulator, the plan solvency deficit is expected to be funded by December 2022. The Credit Union paid \$1,374 (2014 - \$1,423) for employer contributions to the plan in fiscal year 2015. As a result of the valuation, the employer contribution rates were determined to be 14.0% to 22.4% per annum, depending on the planholder's age based on the pensionable earnings of the respective participating employees for the period from January 1, 2013 to December 31, 2015.

The investment policy relative to the majority of the funded plan assets reflects the Trustees' belief that the asset mix strategy should contain a combination of return enhancing and liability/duration matching investments to achieve the plan's investment return objectives and to protect the plan from significant fluctuations in the plan's solvency ratio.

As part of a de-risking strategy and considering the current funded position (based on solvency), the Trustees have adopted a formal transition schedule to shift to a long-term asset mix. As each funding milestone is achieved over time, the plan is increasingly de-risked by shifting its asset allocation gradually from equity to fixed income. The Trustees may, at their discretion, elect to accelerate the transition from fixed income relative to the schedule, by directing the plan's periodic cash flows to long-term bonds.

Investments are diversified such that the failure of any single investment would not have a material impact on the overall level of assets. The largest proportion of assets is invested in equities; although, the plan also invests in properties, bonds and cash.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

The expected return on plan assets is determined by considering the expected returns available on the assets underlying the current investment policy. Expected yields on fixed interest investments are based on gross redemption yields as at the date of the consolidated statement of financial position. Expected returns on equity and property investments reflect long-term rates of return experienced in the respective markets. The actual return on plan assets for the year ended December 31, 2015 was \$1,365 (2014 - \$2,078).

c) Future contributions and benefit payments

The expected contributions and benefit payments for the year ending December 31, 2016 are as follows:

	•
Employer contributions Employee benefits	2,155 (1,866)

d) The amounts recognized in the consolidated statement of income were as follows:

	2015 \$	2014 \$
Current service cost (net of employee contributions) Interest cost Administration costs Interest income	855 1,147 62 (761)	653 1,129 42 (802)

MSP	4.00	4.00
Dental	3.00	3.00

For plans or portion of plans where indexing is used, future pension increase assumptions are based on 50% of the inflation rate.

Assumptions regarding future mortality are set based on actuarial advice in accordance with published statistics and experience. Mortality assumptions are based on the CPM 2014 Mortality Table with 105% pension size adjustment factors and generational mortality improvements in accordance with the CPM Improvement Scale B. The projection factors are in accordance with the published table Scale AA where annual improvements range from 0.4% to 2% for males and 0.3% to 1.8% for females.

The tables translate the average post-retirement life expectancy of males to 22 years (2014 - 22 years) and females to 24 years (2014 - 24 years) for a pensioner retiring at age 65.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions presented below was performed by changing each assumption individually. If an actual change occurs, it is likely that some of these assumptions are correlated, which could change the combined impact.

	2015 %	2014 %
Discount rate Impact of: 1% increase 1% decrease	(4,349) 5,603	(4,362) 5,621
Inflation rate Impact of: 1% increase 1% decrease	1,360 (1,245)	1,353 (1,239)
Future salary increases Impact of: 1% increase 1% decrease	1,308 (1,197)	1,212 (1,082)
Medical/dental trends Impact of: 1% increase 1% decrease	113 (99)	176 (150)

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

- g) Through its defined benefit plans, the Credit Union is exposed to a number of risks, the most significant of which are detailed below:
 - i) Investment risk

The defined benefit obligation is calculated with a discount rate. If the return on assets is lower than the discount rate, it will create a deficit.

ii) Interest rate risk

A variation in bond rates will affect the value of the defined benefit obligation.

iii) Longevity risk

A greater increase in life expectancy than the one predicted by the mortality table used will increase the defined benefit obligation

iv) Inflation risk

The defined benefit obligation is calculated taking into account an increase in the level of salary and future cost of living adjustments. If actual inflation is greater than expected, that would result in an increase in the defined benefit obligation.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

h) Participation in multi-employer plan

The Credit Union participates in a plan for certain eligible employees which is administered by Central 1.

The Credit Union is one of several employers that participate in the BC Credit Union Employees' Pension Plan (the "Plan"). The Plan is a multi-employer contributory defined benefit pension plan governed by a 12-member Board of Trustees. The Board of Trustees is responsible for overseeing the management of the Plan, including investment of the assets and administration of the benefits. The Plan, as at December 31, 2012, had about 3,100 active employees and approximately 550 retired plan members. Total plan assets at December 31, 2015 are estimated at \$552,000 (2014 - \$487,000). Every three years, an actuarial valuation is performed to assess the financial position of the Plan and the adequacy of the funding level. The most recent actuarial valuation, which was conducted as at December 31, 2012, indicated a going concern unfunded liability of \$32,330 and a solvency deficiency of \$129,869. The deficit is targeted to be financed over time through increased contributions, collectively, from the participating employers. The pension regulator has determined the period during which the solvency deficit must be funded. As approved by the regulator, the plan solvency deficit is expected to be funded by October 2022. The Credit Union paid \$2,238 (2014 - \$2,210) for employer contributions to the Plan in fiscal year 2015. As a result of the valuation, the contribution rates were determined to be 14.8% per annum for employer contributions based on the pensionable earnings of the respective participating employees and 2.5% to 9% per annum, depending on the planholder's age, for employee contributions for the period from October 1, 2013 to December 31, 2015. The contributions continue to be expensed as invoiced by the Plan.

The next actuarial valuation is scheduled for December 31, 2015 with results available in mid-2016.

Reconciliation of effective tax rate

Deferred taxes are calculated on all temporary differences under the liability method using an effective tax rate. The income tax expense differs from the amount that would be computed by applying the combined federal and provincial statutory income tax rates of 26.00% (2014 - 26.00%) to income before income taxes. The reasons for the differences are as follows:

	2015 \$	2014 \$
Computed tax expense (Decrease) increase resulting from	2,338	2,167
Preferred rate amount deduction for credit unions Non-taxable items	(910) 118	(910) 59
Effect of tax rate changes on deferred income tax asset Other	(114) (27)	(347) 74
	1,405	1,043

The effective tax rate for the Credit Union net of the credit union deduction was 15.9% (2014 - 15.1%). The overall tax rate was 15.4% (2014 - 12.3%). The rates reflect adjustments to the prior year tax return and provision adjustments due to more accurate information available at the time of filing the return.

Deferred income tax assets and liabilities are as follows:

	2015 \$	2014 \$
Deferred income tax assets		
To be recovered within 12 months To be recovered after more than 12 months	3,345 543	3,091 196
	3,888	3,287
Deferred income tax liabilities		
To be settled within 12 months To be settled after more than 12 months	842 587	652 405
	1,429	1,057

21 Commitments and contingent liabilities

Commitments

Leases

The Credit Union's premises are leased for varying terms and the majority of the leases are renewable at the end of the lease period at market rate. Lease payments included in occupancy expense amounted to \$5,526 (2014 - \$5,516). Future minimum lease commitments under non-cancellable operating leases are as follows:

	2015 \$	2014 \$
Due in < 1 year Due in 2-5 years Due in > 5 years	5,814 18,258 7,802	5,754 17,939 8,836
	31,874	32,529

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

Letters of credit and other guarantees

In the normal course of business, the Credit Union has outstanding letters of credit issued on behalf of members totalling \$11,590 (2014 - \$8,164), which are secured by member term deposits or property mortgages.

Undrawn loan commitments to members

Refer to note 22.

Contingent liabilities

In the course of its business, various claims and legal proceedings may arise against the Credit Union. The Credit Union defends itself where appropriate and is currently of the opinion that it is likely to prevail; accordingly, no provision has been made in these consolidated financial statements.

22 Risk management

The Credit Union's risk management policies are designed to identify and analyze risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Credit Union follows an enterprise risk management framework, which involves identifying particular events or circumstances relevant to its objectives, assessing them in terms of probability and magnitude, determining a response strategy and monitoring progress. The Credit Union regularly reviews its risk management policies and systems to take account of changes in markets, products and emerging best practice.

Risk management is carried out by a number of delegated committees reporting to the Board. The Board approves written principles for risk tolerance and overall risk management, and management reports to the Board on compliance with the risk management policies of the Credit Union. In addition, the Credit Union maintains an internal audit function, which is responsible for independent review of risk management and the Credit Union's control environment.

Financial instruments comprise the majority of the Credit Union's assets and liabilities. The Credit Union accepts deposits from members at both fixed and floating rates for various periods and seeks to earn an interest rate margin by investing these funds in high quality financial instruments - principally mortgages. The primary types of financial risk that arise from this activity are credit risk, liquidity risk and market risk.

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

The following table describes the significant financial instrument activity undertaken by the Credit Union, the risks associated with such activities and the method used in managing those risks:

Activity	Risk	Method
Fixed rate savings products and funding activities involving fixed rate instruments	Sensitivity to changes in interest rates	Asset-liability matching and periodic use of derivatives
Fixed rate mortgages	Sensitivity to changes in interest rates	Asset-liability matching and periodic use of derivatives
Index-linked deposit products	Sensitivity to changes in Canadian equity indices	Options
Foreign currencies	Sensitivity to changes in foreign currency	Asset-liability matching and investment limits

Credit risk

Credit risk is the risk of a financial loss occurring due to a Credit Union member's or counterparty's inability or refusal to fully honour the contractual obligations of a financial instrument. This risk results from being a party to a financial instrument with a counterparty. Allowances for credit losses are made for losses that have been incurred at the statement of financial position date. Significant changes in the economy of British Columbia, specifically the Greater Vancouver, Fraser Valley and Okanagan areas, or deteriorations in lending sectors that represent a concentration within the Credit Union's loan portfolio may result in losses that are different from those provided for at the statement of financial position date.

The classes of financial instruments to which the Credit Union is most exposed are loans to members, cash resources and derivatives. The following table presents the maximum exposure to credit risk of financial instruments including undrawn commitments of \$369,125 (2014 - \$311,219):

Notes to Consolidated Financial Statements

Management of credit risk is an integral part of the Credit Union's activities. Management carefully monitors and manages the Credit Union's exposure to credit risk by a combination of methods. Credit risk arises principally from lending activities that result in member loans and advances and treasury activities that result in investments in cash resources. There is also credit risk in unfunded loan commitments. The overall management of credit risk is centralized in the Investment and Lending Committee, which reports to the Board, and the respective operating units of the Credit Union.

Concentration of loans is managed by the implementation of sectoral and member specific limits as well as the periodic use of syndications with other financial institutions to limit the potential exposure to any one member.

The Investment and Lending Committee is responsible for approving and monitoring the Credit Union's tolerance for credit exposures, which it does through review and approval of the Credit Union's lending policies and through setting limits on credit exposures to individual members and across sectors. The Credit Union maintains levels of borrowing approval limits, and prior to advancing funds to a member, an assessment of the credit quality of the member is made. The Credit Union emphasizes responsible lending in its relationships with members and establishes that loans are within the member's ability to repay, rather than relying exclusively on collateral.

Loans to members consist of \$1,394,872 (2014 - \$1,346,726) residential loans which are secured by residential property, with a further \$171,359 (2014 - \$191,607) secured personal loans. Loans to members also include \$186,210 (2014 - \$160,380) of unsecured loans, which principally consist of personal loans and lines of credit.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

The Credit Union often takes collateral as security in common with other lending institutions. The Credit Union maintains guidelines on the acceptability of specific types of collateral. Collateral may include mortgages over residential properties and charges over business assets such as premises, inventory and accounts receivable. Where significant impairment indicators are identified, the Credit Union will take additional measures to manage the risk of default, which may include seeking additional collateral.

For the Personal Banking loan portfolio (residential and consumer loans), the Credit Union's underwriting methodologies and risk modelling are member based rather than product based. The Credit Union reviews the member's capacity to repay the loan rather than relying exclusively on collateral; although, it is an important mitigant of establishing credit risk. Decisions on consumer loans are based on an overall assessment of credit risk utilizing a scoring model that takes into account factors such as Beacon scores and debt levels relative to income.

The credit quality of the Business Banking loan portfolio for those loans that are neither past due nor impaired can be assessed by reference to the Credit Union's internal rating system. The Credit Union assesses the quality of Business Banking loans using an internal rating tool taking into consideration a number of factors, such as the security, the borrower's management performance, current and projected financial results and industry statistics related to the borrower's industry, and utilizes the experience and judgment of the Credit department. Business Banking loans are divided into segments based on the following rating system and are regularly reviewed and updated as appropriate:

Risk rating	Risk rating descriptions
1 - 2	Excellent to very good - account is identified to be low or normal risk, requires minimal staff oversight and has a low risk of default
3	Satisfactory - account has acceptable levels of risk with a potential for a heavier reliance on asset security. Staff maintain a certain level of oversight based on assessment factors and industry business practices
4 - 5	Less than satisfactory to poor - management involvement is required as account is identified to be of higher risk driven by a material adverse change, deterioration of the financial situation of the member or major security deficiency

The Business Banking loan portfolio for those loans that are neither past due nor impaired is as follows:

Risk rating	2015 \$	2014 \$
1 - 2 3 4 - 5	31,181 528,844 5,454	12,221 582,292 11,919
	565,479	606,432

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

Credit risk within the Treasury department arises from the investments in cash resources held by the Credit Union to meet regulatory and internal liquidity requirements and for general business purposes. This aspect of credit risk is principally managed by the Treasury department, which reports to the Investment and Lending Committee. The Treasury department managed assets consist of cash resources and interest bearing deposits with financial institutions held with Central 1.

Liquidity risk

Liquidity risk is the risk that the Credit Union will encounter difficulty in raising funds to meet its obligations to members and other liabilities. To mitigate this risk, the Credit Union is required by the FIA to maintain a minimum liquidity threshold at all times, based on total members' deposits and non-equity shares. At December 31, 2015, the Credit Union's liquidity exceeded the required level. Included in cash and cash equivalents and interest bearing deposits with financial institutions are minimum liquidity threshold cash resources of \$219,207 (2014 - \$202,000). The Credit Union's own risk management policies require it to maintain sufficient liquid resources to cover cash flow imbalances, to retain member confidence in the Credit Union and to enable the Credit Union to meet all financial obligations. This is achieved through maintaining a prudent level of liquid assets, through management control of the growth of the loan portfolio, securitizations and asset-liability maturity management techniques. Management monitors rolling forecasts of the Credit Union's liquidity requirements on the basis of expected cash flows as part of its liquidity management. The Credit Union also maintains borrowing facilities of \$156,724 as an integral part of its liquidity management strategy, as disclosed in note 11.

Cash flows payable under financial liabilities which represent the Credit Union's exposure to liquidity risk by remaining contractual maturities are as follows:

	Less than 1 year \$	1 - 3 years \$	4 - 5 years \$	Total \$
2015				
Member deposits Borrowings	1,874,944	541,830	30,613	2,447,387

Secured borrowings	, -	81,439	101,956	183,395

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

Market risk

Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of the Credit Union's financial instruments will fluctuate due to changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in prevailing market interest rates. Net interest income reported in the consolidated statement of income may increase or decrease in response to changes in market interest rates. Accordingly, the Credit Union sets limits on the level of mismatch of interest rate repricing that may be undertaken, which is monitored by the Credit Union's Treasury department and reported to the Asset and Liability Committee ("ALCO"), which is responsible for managing interest rate risk.

In managing interest rate risk, the Credit Union relies primarily upon the use of asset-liability and interest rate sensitivity simulation models. Periodically, the Credit Union may enter into interest rate swaps to adjust the exposure to interest rate risk by modifying the repricing of the Credit Union's financial instruments. The Credit Union's derivative instruments are disclosed in note 24.

Sensitivity analysis is used to assess the change in value of the Credit Union's financial instruments against a range of incremental basis point changes in interest rates over a 12-month period. Interest rate shock analysis is calculated in a similar manner to sensitivity analysis but involves a more significant change of 100 basis points or greater in interest rates. Sensitivity analysis and interest rate shock analysis are calculated on a monthly basis and are reported to the ALCO. Based on current differences between financial assets and financial liabilities as at December 31, 2015, the Credit Union estimates that an immediate and sustained 100 basis point increase in interest rates would decrease net interest income by \$117 (2014 - \$243) over the next 12 months while an immediate and sustained 100 basis point decrease in interest rates would increase net interest income by \$1,033 (2014 - decrease of \$295) over the next 12 months.

Other types of interest rate risk may involve basis risk. The risk of loss arising from changes in the relationship of interest rates that have similar but not identical characteristics, for example the difference between prime rates and the Canadian Deposit Offering Rate ("CDOR"), and prepayment risk (the risk of loss of interest income arising from the early repayment of fixed rate mortgages and loans) are also monitored on a regular basis and are reported to the ALCO.

The carrying amounts of interest-sensitive assets and liabilities are presented in the periods in which they next reprice to market rates or mature and are summed to show the interest rate and maturity gap.

The gap position presented below represents the position outstanding at the close of the business day and may change significantly in subsequent periods based on member behaviour and the application of the Credit Union's asset and liability management policies.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

Assets

Fixed term assets, such as residential mortgage loans and consumer loans, are reported based on scheduled repayments.

Assets that are related to the Credit Union's prime rate or other short-term market rates are reported in the variable rate category.

Liabilities

Fixed rate liabilities, such as term deposits, are reported at scheduled maturity.

Interest bearing deposits on which the member interest rate changes with prime or other short-term market rates are reported within variable rate category.

Foreign exchange risk

Foreign exchange risk is not considered significant at this time as the Credit Union does not engage in any active trading of foreign currency positions or hold significant foreign currency denominated financial instruments for an extended period. Foreign currency denominated deposits are matched with foreign currency denominated liquidity to minimize any exposure. Foreign exchange revenues earned by the Credit Union are primarily generated by crystallized spreads on dollars exchanged with members.

23 Capital management

The FIA requires the Credit Union to maintain, at all times, a capital base which is adequate in relation to its business. Capital levels for credit unions in British Columbia are regulated pursuant to guidelines issued by the Financial Institutions Commission of British Columbia ("FICOM"). Minimum capital standards are based on a total capital to risk weighted assets ("RWA") ratio of 8%, along with a requirement that at least 35% of the capital base consist of retained earnings. The Credit Union met this requirement throughout 2015 and 2014. Capital is managed in accordance with policies established by the Board. Management regards a strong capital base as an integral part of the Credit Union's strategy. The Credit Union has a capital plan to provide a long-term forecast of capital requirements. All of the elements of capital are monitored throughout the year, and modifications of capital management strategies are made as appropriate.

The capital ratio as determined by FICOM's prescribed rules relating to on-statement of financial position and off-statement of financial position exposures is calculated by dividing total capital by RWA, which is the assets weighted according to relative risk (0% to 150%).

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

The total capital is as follows:

	2015 \$	2014 \$
Equity shares Retained earnings (non-consolidated) Deferred income tax assets 50% of the Credit Union's proportion of retained earnings in CUDIC, Central 1 and Stabilization Central Credit Union as	7,676 123,515 (2,381)	8,709 116,091 (2,159)
advised by FICOM Deductions from capital	20,102 (1,141)	18,580 (998)
	147,771	140,223

24 Derivative financial instruments

The table below provides an analysis of the Credit Union's derivative-related credit exposure:

	2015			2014
	Notional amount \$	Fair value \$	Notional amount \$	Fair value \$
Equity options Interest rate swaps	1,590 300,000	78 3,606	3,670 290,000	292 1,545
		3,684		1,837

Notional amounts are the contract amounts used to calculate the cash flows to be exchanged; they do not represent credit or market risk exposure.

The table below presents the recognized financial instruments that are subject to enforceable master netting arrangements but not offset and shows in the 'Net' column the result if all set-off rights were exercised.

	Amounts not offset		Net
	Financial instruments \$	Cash collateral pledged received \$	\$
2015 Derivative assets Derivative liabilities	4,515 (909)	- -	3,606
2014 Derivative assets Derivative liabilities	2,062 (517)	- -	1,545 -

Notes to Consolidated Financial Statements **December 31, 2015**

(expressed in thousands of dollars)

The Credit Union is subject to an enforceable master netting arrangement in the form of an ISDA agreement with a derivative counterparty. Under the terms of that agreement, offsetting of derivative contracts is permitted only in the event of bankruptcy or default of either party to the agreement. No amounts are offset and presented net on the consolidated statement of financial position.

Fair values based on quoted market prices are not available for a significant portion of the Credit Union's derivative instruments. Consequently, fair values are derived using present value and other valuation techniques and may not be indicative of the net realizable values.

The following is a summary of the nature of derivative instruments utilized:

a) Interest rate swaps are transactions in which two parties exchange interest flows on a specified notional amount for a predetermined period, based on agreed upon fixed and floating rates. Notional amounts are not exchanged.

The Credit Union hedges a portion of the interest rate risk that arises on variable interest cash flows on prime rate mortgages through interest rate derivatives. Interest income and expense include the release from other reserves of gains or losses relating to the effective portion of qualifying hedging derivatives designated as cash flow hedges either:

- i) as the hedged item is recorded in interest income (expense); or
- ii) when the forecasted cash flow of the hedged item is no longer probable.

Any ineffectiveness in the hedging relationship is recorded directly in the consolidated statement of income.

During the year ended December 31, 2015, \$219 (net of tax of \$41) (2014 - \$ nil) was the effective portion of changes in fair value for cash flow hedges in the year. The amount transferred to the consolidated statement of income was \$nil (2014 - \$nil).

Consolidated other comprehensive income contains \$218 (2014 - \$nil) in unrealized net gains on derivatives.

From time to time, the Credit Union enters into derivative transactions to economically hedge certain business strategies that do not otherwise qualify for hedge accounting, or where hedge accounting is not considered economically feasible to implement. During the year ended December 31, 2015, \$1,801 (2014 - \$1,914) was recorded in net interest income as unrealized changes in fair value of these derivatives. In addition, net interest income includes \$807 (2014 - \$1,532) in realized net gains, of which \$177 (2014 - \$236) was released from other comprehensive income.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

b) Index-linked call options are equity contracts to pay or receive cash flows based on the increase or decrease in the underlying index or security. The Credit Union utilizes index-linked option contracts in order to economically hedge interest expense on the equity index-linked deposits.

The fair value of all outstanding derivative contracts in a gain position, which takes into account credit risk without factoring in the impact of master netting agreements, totalled \$4,593 as at December 31, 2015 (2014 - \$2,354). The Credit Union manages this credit risk by dealing with counterparties with a minimum credit rating of "A", and setting specific limits for investments with those counterparties, which are reviewed monthly.

25 Fair value of financial instruments

The Credit Union has estimated fair values taking into account changes in interest rates and credit risk that have occurred since the assets and liabilities were acquired. These calculations represent management's best estimates based on a range of methods and assumptions; since they involve uncertainties, the fair values may not be realized in an actual sale or immediate settlement of the instruments. Interest rate changes are the main cause of changes in the fair value of the Credit Union's financial instruments. The carrying value is a reasonable approximation of fair value for the Credit Union's cash and cash equivalents, demand deposits, and certain other financial assets and liabilities.

The fair values of financial instruments are as follows:

a) Interest bearing deposits with financial institutions

The fair value of interest bearing deposits with financial institutions is determined by discounting remaining contractual cash flows at current market interest rates offered for deposits with similar terms and risks.

b) Derivative financial instruments

The fair value of derivative financial instruments is determined by using quoted market benchmark rates from an independent source. The Credit Union uses a valuation method that includes discounted cash flows on the remaining contractual life of a derivative instrument, and valuation models that use observable market data together with a consideration of the credit risk of both parties to the derivative.

c) Loans to members

In determining the fair value of loans to members, the Credit Union incorporates the following assumptions:

- i) Fair values are determined by discounting remaining contractual cash flows at current market interest rates offered for loans with similar terms, adjusting for estimated prepayments expected.
- ii) The total value of loans determined using the above assumption is reduced by the allowance for credit losses to determine the fair value of the Credit Union's loan portfolio.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

d) Borrowings

The fair value of borrowings is determined by discounting remaining contractual cash flows at current market interest rates offered for borrowings with similar terms and risks.

e) Member deposits

In determining the fair value of member deposits, the Credit Union incorporates the following assumptions:

- For fixed rate, fixed maturity deposits, the Credit Union discounts the remaining contractual cash flows, adjusted for expected redemptions, at market interest rates offered for deposits with similar terms and risks.
- ii) For floating rate deposits, changes in interest rates have minimal impact on the fair value since deposits reprice to market frequently. On that basis, fair value is assumed to equal carrying value.

The following represents the approximate fair values of financial instruments of the Credit Union as at the statement of financial position date:

			2015			2014
	Carrying value \$	Fair value \$	Difference \$	Carrying value \$	Fair value \$	Difference \$
Financial assets						
Interest bearing deposits with financial institutions Derivative financial	457,533	458,296	763	271,366	273,146	1,780
instruments	4,593	4,593	-	2,354	2,354	-
Investments	70,923	71,555	632	39,629	39,854	225
Loans to members	2,321,062	2,337,486	16,424	2,308,989	2,325,801	16,812
Financial liabilities						
Borrowings	293,109	294,822	(1,713)	227,037	226,653	384
Member deposits Derivative financial	2,447,570	2,453,883	(6,313)	2,286,237	2,289,112	(2,875)
instruments	909	909	-	517	517	-

The following tables summarize the fair value of financial instruments which are accounted for at fair value on the Credit Union's consolidated statement of financial position. Fair value measurements are analyzed according to a fair value hierarchy of three levels, as outlined below. Observable inputs represent instances where market data is obtained from independent sources. Unobservable inputs are based on the Credit Union's own internal assumptions. There were no transfers between levels for the current year.

Level 1: Unadjusted market prices in active markets for identical assets and liabilities.

Level 2: Inputs, other than quoted prices included within Level 1, that are observable for the asset or liability either directly or indirectly. This level includes the majority of over the counter derivatives and certain monetary instruments.

Notes to Consolidated Financial Statements

December 31, 2015

(expressed in thousands of dollars)

Level 3: Inputs which are not based upon market observable data.

			2015

The Credit Union has financial instruments classified as Level 3 in the fair value hierarchy and has provided an analysis of movements in Level 3:

	2015 \$	2014 \$
At January 1 Changes in Central 1 equity shares and other investments	9,838 2,153	8,946 892
At December 31	11,991	9,838

As described in note 7, the fair value of the Credit Union's Level 3 investments cannot be reliably determined; therefore, they are recorded at cost. Accordingly, no sensitivity analysis can be provided.

26 Related party disclosure

Related parties of the Credit Union include subsidiaries, associates, post-employment benefit plans, directors and other key management personnel ("key management"), close family members of key management and entities which are controlled, jointly controlled or significantly influenced, or in which significant voting power is held, by key management or their close family members.

a) Loans and deposits

The Credit Union provides banking services to key management and persons connected to them.

A number of transactions were entered into with key management in the normal course of business. All loans to directors, executive management and employees of the Credit Union are subject to the credit policies established for all members. Credit Union employees may receive special rates or other considerations with respect to loans at the Credit Union. Directors do not receive special rates or other considerations with respect to loans at the Credit Union.

No provisions or loan write-offs have been recognized in respect of loans given to related parties (2014 - \$nil).
